

Just a quick submission.

I have noticed that over time we are getting less and less information on tax expenditures. Four things we would like to see as soon as possible:

1. Figures available as a spread sheet.
2. Provide the totals for eg superannuation and other things that are usefully collected – business concessions etc.
3. Reinstate the functional classifications of tax concessions so they may be compared with expenses/spending.
4. Produce long run series in a similar way we have long run data in Section 11 of Budget Paper no 1.

Thank you
