

To Whom This May Concern,

I make the below points:

- The General Public of Australia need realistic Superannuation, particularly in the Farming Industry.
- The General Public of Australia need a High Risk Debt Mediation Dept set up to fight against Real estate Industry, Corporate Industry and, Financial Sector Corruption, perhaps set up as a court preventative measure.
- The General Public need to be able to be protected against Lawyers and Court corruption.

I am sick of hearing how the GENERAL PUBLIC are being mistreated, losing homes, losing super, losing education, & with no real representation.

Stop increasing tax on the General Public and start recouping the money back from the exploiters of the 2007 GFC. Then can I only see balance being restored with little impact on the health and wellbeing of the General Public of Australia.

Warning: When you have mediocre representation from State Govt, it filters down.

Kind regards,

Jean Cashmore
