

Objection

The proposed changes will be putting the 'nation builders', ie residential property investors '@ a disadvantage Please remember that we need to assist each other, in our task of maintaining our national assets, including tenants & owners; to sustain this, our very own, 'land locked', economy ...

When the 'owner' of the property is put @ a dis-advantage; this shall have a ripple effect on the government of the time as well ie via the 'ripple effect' ...

Thank you
