MAJOR CHANGES FROM 2013

Since the 2013 Tax Expenditures Statement (TES), a number of tax expenditures have been deleted where those tax expenditures had been abolished by 15 December 2014, that is, by when the 2014-15 *Mid-Year Economic and Fiscal Outlook* was released.

This includes all tax expenditures related to the carbon tax and the Minerals Resource Rent Tax (MRRT), and also several other tax expenditures abolished in recent years.

Appendix B lists all modified and deleted tax expenditures.

There are no new tax expenditures in the 2014 TES.

The Temporary Budget Repair Levy, higher fringe benefits tax (FBT) rate and associated FBT changes applying from 2014-15 to 2016-17 have been incorporated into the personal income tax, superannuation and FBT benchmarks.

The Government repealed the MRRT with effect from 1 October 2014. Consequently the benchmark tax rate for iron ore and coal extraction has been set to zero. This is the same benchmark that was used before the introduction of the MRRT.

The Government repealed the carbon tax with effect from 1 July 2014. Consequently the carbon price benchmark has been removed.

CHAPTER 1: INTRODUCTION

A tax expenditure arises where the actual tax treatment of an activity or class of taxpayer differs from the benchmark tax treatment.

- Tax expenditures typically involve tax exemptions, deductions or offsets, concessional tax rates and deferrals of tax liability.
- A positive tax expenditure reduces tax payable relative to the benchmark. A negative tax expenditure increases tax payable relative to the benchmark.

Benchmarks represent a standard taxation treatment that applies to similar taxpayers or types of activity.

- Benchmarks may also incorporate structural elements of the tax system; for example, the progressive income tax rate scale for individual taxpayers.
- The benchmarks used in the 2014 TES are outlined in [Appendix A](#).

Determining benchmarks involves judgment. Consequently, the choice of benchmark may be contentious and benchmarks may vary over time.

- To facilitate discussion and understanding of the impact of using different benchmarks, the 2013 TES included an illustrative case study which showed the differences in the estimates for superannuation tax expenditures if an expenditure tax benchmark was used rather than the usual income tax benchmark – see *Appendix A, 2013 Tax Expenditures Statement*. Although that exercise has not been repeated for this year’s TES, the conceptual points that were discussed last year remain.

The Tax Expenditures Statement

The annual TES provides a description of Australian Government tax expenditures and, where possible, the estimated value or order of magnitude of the tax expenditure.

The TES is intended to facilitate scrutiny of tax expenditures by Parliament and parliamentary committees, the media and the general public. Transparent reporting of tax expenditures also helps inform debate on the efficiency and equity of the tax system.

This TES reflects Australian Government policy up to and including the 2014-15 *Mid-Year Economic and Fiscal Outlook*.

Estimating tax expenditures

Consistent with most OECD countries, estimates of the size of tax expenditures in the TES reflect the existing utilisation of a tax expenditure, similar to Budget estimates of outlays on demand-driven expenditure programmes. This is known as the 'revenue forgone' approach.

- For example, Budget Paper No.1, Budget Statement 6 – Expenses and Net Capital Investment, reports expenditure on the age pension. Broadly, the amount reported reflects the number of age pension recipients and the amount of pension each receives. Budget Paper No.1 does not provide any estimate of the hypothetical saving to the Budget should the expenditure cease.
- Similarly, the estimated size of a tax expenditure reflects the number of taxpayers utilising the tax expenditure and the notional amount of tax expenditure each receives. Revenue forgone estimates do not indicate the hypothetical saving to the Budget should the tax expenditure cease.

In practice, the revenue forgone approach involves estimating the difference in revenue between the existing and benchmark tax treatments, but importantly assuming taxpayer behaviour is the same in each circumstance.

This approach can be illustrated using the GST exemption for water, sewerage and drainage services (H6).

- By definition, no GST revenue is raised under the existing tax treatment. The benchmark treatment is the imposition of GST on water, sewerage and drainage services. The estimated value of the tax expenditure is therefore the amount of GST revenue that would be raised on water, sewerage and drainage services assuming that consumption of these services remained unchanged under a GST.

An alternative approach involves estimating the impact of abolishing a tax expenditure taking account of the potential changes in taxpayer behaviour, unlike revenue forgone estimates. This is known as the 'revenue gain' approach. Because of this, revenue gain estimates are often lower than revenue forgone estimates.

- Introducing a tax expenditure may create incentives for taxpayers to change their behaviour to utilise (or avoid) the new tax provision. Removing the tax expenditure (so that the benchmark tax treatment prevailed) would remove this incentive and may cause a corresponding change in taxpayer behaviour.

In particular, taxpayers may make greater use of other tax expenditures if a particular tax expenditure were to be (hypothetically) abolished.

- For example, a revenue gain estimate for the concessional treatment of employer superannuation contributions would take account of the potential for voluntary employer contributions to be redirected to other tax-preferred investments.

Revenue gain estimates should be treated with particular caution.

- They assume that a tax expenditure is abolished, which may be implausible in many cases.
- In practice, the revenue gain can be difficult to estimate as there is usually little, if any, information on how taxpayers might react to the removal of a tax expenditure. Assumptions about taxpayer behavioural responses therefore need to be made, and these assumptions can be difficult to meaningfully substantiate.
- Judgments also need to be made about likely policy settings – for example, whether it is realistic to assess the abolition of a single tax expenditure (for example, a particular GST exemption) while keeping other tax expenditures unchanged (for example, other GST exemptions).

Consistent with a recommendation of the Australian National Audit Office in its 2007-08 performance audit of the TES, the TES reports revenue gain estimates for 10 large tax expenditures.¹

Interpreting tax expenditure estimates – additional caveats

Tax expenditure estimates in different editions of the TES are generally not comparable.

- Estimates may change between editions as benchmarks are modified, new tax expenditures are identified, revised or new data becomes available, or changes in modelling methodology are made.

Readers should exercise care when comparing tax expenditure estimates with direct expenditure estimates.

- Tax and direct expenditure estimates may measure different things. For example, the tax expenditure estimate for the Private Health Insurance Rebate (A17) relates to the tax exemption for the rebate, not the rebate itself.
- Direct expenditure estimates of non-taxable transfer payments effectively include the value of the tax exemption for the payments. Summing the direct and tax expenditure estimates would therefore overstate the cost of the government support to the budget.

Tax expenditure estimates are not additive, particularly because the removal of one tax provision will often affect the utilisation of others.

1 ANAO Audit Report No. 32, 2007-08, *Preparation of the Tax Expenditures Statement*, Recommendation 5.

Large tax expenditures

Table 1.1 lists the largest measured tax expenditures for 2014-15.

The table includes revenue gain estimates for several of the largest tax expenditure items. These estimates illustrate the points made above that:

- significant differences can arise between revenue forgone and revenue gain estimates, particularly because the latter attempts to take account of behavioural change by taxpayers; and
- conversely, in some cases, revenue gain and revenue forgone estimates are identical or very similar as taxpayer behaviour is assumed to be relatively insensitive to a tax expenditure.

Unquantified tax expenditures have been assigned an order of magnitude rather than an estimate of their value. The largest such tax expenditures are as follows:

- income tax exemption for Commonwealth, State and Territory public authorities, and State and Territory entities (B3);
- exemption for foreign branch profits from income tax (B11);
- off-market share buy-backs (B28);
- philanthropy – income tax exemption for registered charities, public educational, scientific and community service entities (B56); and
- quarantining of capital losses (E27).

Table 1.1: Large measured tax expenditures for 2014-15

Tax expenditure	Estimate \$m	
	Revenue forgone	Revenue gain
Large positive tax expenditures		
E6 Capital gains tax main residence exemption — discount component	25,500	n/a
E5 Capital gains tax main residence exemption	20,500	n/a
C3 Concessional taxation of employer superannuation contributions	16,300	15,550
C6 Concessional taxation of superannuation entity earnings	13,400	11,750
H28 GST — Food	6,400	6,300

H2 GST — Financial supplies - input taxed treatment	3,550	3,550
H19 GST — Health - medical and health services	3,550	3,500
C5 Concessional taxation of non-superannuation termination benefits	2,700	2,700
A38 Exemption of Family Tax Benefit payments	2,220	2,220
B73 Statutory effective life caps	1,945	n/a
B14 Exemption from interest withholding tax on certain securities	1,860	1,310
A19 Medicare levy exemption for residents with taxable income below the low-income thresholds	1,710	n/a
A17 Exemption of the Private Health Insurance Rebate	1,570	n/a
D10 Exemption for public and not-for-profit hospitals and public ambulance services	1,400	n/a
D14 Exemption for public benevolent institutions (excluding public and not-for-profit hospitals)	1,360	n/a
F8 Concessional rate of excise levied on aviation gasoline and aviation turbine fuel	1,230	n/a
H20 GST — Health - residential care, community care and other care services	1,110	n/a
A54 Philanthropy — deduction for gifts to deductible gift recipients	1,100	n/a
H5 GST — Child care services	1,090	n/a
B80 Research and development — non-refundable tax offset	1,070	n/a
H6 GST — Water, sewerage and drainage	1,050	n/a
B75 Capital works expenditure deduction	960	n/a
H3 GST — Financial supplies - reduced input tax credits	900	n/a
Large negative tax expenditures		
F24 Customs duty	-2,550	-2,550
F12 Higher rate of excise levied on cigarettes not exceeding 0.8 grams of tobacco	-1,840	n/a

Compared to the list of large tax expenditures in the 2013 TES, the biggest change in estimates are to the two tax expenditures relating to the main residence exemption from capital gains tax (E5 and E6). These have increased significantly between the 2013 TES and 2014 TES as a result of the higher than expected increase in housing prices in 2013-14.

CHAPTER 2: TAX EXPENDITURES

2.1 Guide to tax expenditure descriptions

This chapter provides information on all Australian Government tax expenditures in the following format.

Reference codes use the following system:

- A Personal income
- B Business income
- C Retirement income
- D Fringe benefits tax
- E Capital gains tax
- F Commodity and other indirect taxes
- G Natural resources taxes
- H Goods and services tax

Positive estimates indicate a positive tax expenditure – that is, where a tax provision reduces tax payable relative to the benchmark. Negative estimates indicate a negative tax expenditure – that is, a tax provision that increases tax payable relative to the benchmark.

The following codes apply where tax expenditure estimates are not quantified:

- nil
- .. not zero, but rounded to zero

2.2 Tax expenditures

A. PERSONAL INCOME

A1 Deduction for expenses incurred by election candidates

General public services - Legislative and executive affairs (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Legislative reference:</i>	Sections 25-60, 25-65 and 25-70 of the <i>Income Tax Assessment Act 1997</i>								

Certain expenses incurred by candidates contesting federal, state and territory government elections are tax deductible, irrespective of whether they are successful or not. For local government elections, candidates can deduct expenses of up to \$1,000 per election.

A2 Exemption of certain income earned by Australians working overseas

General public services - Foreign affairs and economic aid (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>			
<i>Legislative reference:</i>	Sections 23AF and 23AG of the <i>Income Tax Assessment Act 1936</i>								

Income earned by Australians working overseas for a continuous period of 91 days or more may be exempt from income tax if they are employed to work on certain approved overseas projects or if their foreign employment is directly attributable to:

- the delivery of Australia's overseas aid program by the individual's employer;
- the activities of the individual's employer in operating a developing country relief fund or a public disaster relief fund;
- the activities of the individual's employer being a prescribed institution that is exempt from Australian income tax;
- the individual's deployment outside Australia by an Australian government (or an authority thereof) as a member of a disciplined force; or
- an activity of a kind specified in the regulations.

This exemption may not apply where the foreign earnings are exempt from income tax in the foreign country.

A3 Exemption of income of certain visitors to Australia

General public services - Foreign affairs and economic aid (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Legislative reference:</i>	Sections 842-105 and 768-100 of the <i>Income Tax Assessment Act 1997</i>							

The Australian-sourced income of certain visitors to Australia (for example, visiting foreign government representatives and their entourages) is exempt from income tax. In addition, the official salary and foreign-sourced income of, for example, foreign government representatives visiting Australia when the Vienna Conventions on Consular or Diplomatic Relations do not apply, are exempt from income tax where their home countries provide a reciprocal exemption.

A4 Exemption of official salary and emoluments of officials of prescribed international organisations

General public services - Foreign affairs and economic aid (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Legislative reference:</i>	Section 23AB of the <i>Income Tax Assessment Act 1936</i>						

Australian Federal Police and civilian personnel contributed by Australia to a United Nations armed force may receive compensation for death, impairment or incapacity resulting from their service. Such payments are exempt from income tax. Associated payments, including to the estate of a deceased civilian, may also receive tax relief.

A12 Medicare levy exemption for current and veteran Australian Defence Force personnel and their relatives and associates

Defence (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Legislative reference:</i>	Sections 251T and 251U of the <i>Income Tax Assessment Act 1936</i>						

A Medicare levy exemption applies to income earned by current and veteran Australian Defence Force personnel and certain others, for example, relatives of ADF personnel who are entitled to free medical treatment.

A13 Tax offsets for Australian Defence Force personnel serving overseas and for Australian Federal Police and civilians serving with United Nations forces

Defence (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Legislative reference:</i>	Sections 79B and 23AB(7) of the <i>Income Tax Assessment Act 1936</i>						

Australian Defence Force personnel who serve overseas in a locality specified by the Minister (because of its isolation and uncongenial nature), as well as civilian and Australian Federal Police personnel contributed by Australia to an armed force of the United Nations, may be eligible for a tax offset. The offset includes additional entitlements for individuals who maintain dependants.

A14 Denial of deductibility for HECS-HELP expenses

Education (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

Scholarships and other education allowances paid to full-time students at a school, college or university may be exempt from income tax. Income derived as part of an Australian Government scheme to assist secondary education or the education of isolated children is exempt from income tax (excluding federal education, training or education entry payments provided under the *Social Security Act 1991*). A number of other exempt educational payments are listed in the *Income Tax Assessment Act 1997*.

A16 Threshold for the deductibility of self-education expenses

Education (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

Self-education expenses for the purpose of maintaining or improving skills or knowledge which the taxpayer uses in income earning activities are deductible. In certain circumstances taxpayers are not able to claim a deduction for the first \$250 of an education expense. However, taxpayers can use certain other self-education expenses that are non-deductible, such as child care costs, to reduce the \$250 no-claim threshold.

Individuals carrying on a business and who have an adjusted taxable income of less than \$250,000 may apply losses from a business activity against their other assessable income in that year if they satisfy one of four statutory tests in that year.

This treatment results in some business activities that are non-commercial in nature being treated as commercial. Allowing losses from these activities to be offset against other assessable income in these circumstances gives rise to a tax expenditure.

<i>Commencement date:</i>	1 January 2000					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subsection 35-10(4) of the <i>Income Tax Assessment Act 1997</i>							

The non-commercial losses rules prevent individuals carrying on unprofitable business activities claiming deductions for losses arising from such activities against their other income. Where a business' activity is objectively determined to be commercial in nature, the Commissioner of Taxation allows the taxpayer to apply those losses against their other income.

Individuals that carry on a primary production or professional arts business, who have income from other sources of less than \$40,000, are exempt from the non-commercial losses provisions.

A proportion of individuals carrying on primary production or professional arts businesses that access this exemption and apply losses from their business activity against their other income will nonetheless be carrying on an uncommercial business activity.

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 27H of the <i>Income Tax Assessment Act 1936</i>							

The value of a pension or annuity may consist in part of contributions made from the recipient's after-tax income. This part of the income stream is not taxed again when it is returned in the form of pension or annuity payments. A tax expenditure arises because this part of the pension or annuity is apportioned evenly over the term of the income stream, providing a tax deferral advantage.

No income tax or goods and services tax consequences arise when certain payments are made out of the National Guarantee Fund.

Up until 31 March 2005 the National Guarantee Fund undertook the dual roles of investor protection and clearing support for the Australian Securities Exchange. The *Corporations Act 2001* provides for the splitting of these functions by allowing the transfer of funds for clearing and settlement system support to another entity. A tax expenditure arises because these transfers are permitted free of tax consequences.

<i>Legislative reference:</i>	<i>International Tax Agreements Act 1953</i>							

Tax treaties reduce or eliminate double taxation caused by the exercise of source and residence country taxing rights on cross border income flows. Under Australia's tax treaties, certain dividends, interest and royalties attract reduced withholding tax rates. These include interest withholding tax exemptions for financial institutions and governments and reduced dividend withholding tax rates where dividends are paid to companies with controlling interests in the companies paying the dividends, provided that certain integrity measures are satisfied.

<i>Legislative reference:</i>	Sub-subparagraph 102AAT(1)(a)(i)(F) and paragraph 102AAT(1)(c) of the <i>Income Tax Assessment Act 1936</i>							

Under the transferor trust rules, the transferor would normally be subject to the accruals taxation system. However, the rules do not apply in relation to certain transfers to family, discretionary or non-discretionary trusts, or to transfers made before the transferor commenced being a resident. Transferor trust rules apply to Australian residents who have transferred property or services to a non-resident trust estate.

<i>Legislative reference:</i>	Sections 820-35 and 820-37 of the <i>Income Tax Assessment Act 1997</i>							

The thin capitalisation regime is an integrity measure designed to ensure Australian and foreign owned multi-national entities do not allocate an excessive amount of debt to their Australian operations.

A taxpayer will not be subject to the thin capitalisation regime if their debt deductions and those of their associates do not exceed the threshold amount of \$250,000 for income years commencing prior to 1 July 2014 and \$2 million for later income years. Outward investing entities are also excluded from the thin capitalisation regime if at least 90 per cent of their assets are Australian assets.

<i>Legislative reference:</i>	Subdivision 775-D of the <i>Income Tax Assessment Act 1997</i>							

Taxpayers with low balance bank accounts or credit card accounts denominated in a foreign currency may elect to disregard gains and losses attributable to changes in exchange rates (made in respect of the account). This option is available to all taxpayers other than authorised deposit-taking institutions (ADIs) and non-ADI financial institutions. Accounts with a combined credit or debit balance that does not exceed the foreign currency equivalent of A\$250,000 will generally be eligible.

<i>Legislative reference:</i>	Division 16K of Part III and 177EA of the <i>Income Tax Assessment Act 1936</i>							

The proceeds paid to shareholders who participate in an off-market share buy-back are split into a dividend component and a capital component. The dividend component of the buy-back proceeds may be fully franked. This allows companies that undertake off-market share buy-backs to distribute franking credits to participating shareholders beyond the level that would normally be available. Treating part of the proceeds as a dividend makes off-market share buy-backs more attractive to low marginal tax rate taxpayers. This facilitates streaming of franking credits to those shareholders that can obtain the most benefit. The tax expenditure is equal to the difference in tax payable, had those franking credits been distributed uniformly to all shareholders.

Film production companies incurring expenditure on certain productions in Australia may be eligible for refundable tax offsets. The tax offsets are the location offset, the producer offset and the post, digital and visual effects offset.

As the refundable tax offset is an expense item, it does not appear as a tax expenditure in its own right. However, a tax expenditure arises because payments made under this arrangement are exempt from tax.

B33 Philanthropy — income tax exemption for recreation-type not-for-profit societies

Subject to certain conditions, the income of recreation-type not-for-profit societies, associations or clubs established for the encouragement of sport or games, music, art, animal racing, literature, or established for musical purposes is exempt from income tax.

For those not-for-profit societies, associations or clubs to which the mutuality principle applies, this tax expenditure exempts from income tax those amounts that are not already excluded by the mutuality principle, for instance income generated from non-member transactions. (For a brief explanation of the mutuality principle, refer to section A.3 of Appendix A.)

<i>Legislative reference:</i>	Section 82KZME of the <i>Income Tax Assessment Act 1936</i>							

A prepayment in relation to investments in infrastructure bonds, shares, units, rental property and arrangements entered into before 1 July 2000, to which product rulings apply, continues to be immediately deductible. The benchmark treatment of prepayments is that they are deductible over the period of the expenditure. The tax expenditure allows deductions to be spread over a shorter period and consequently it allows greater deductions than the benchmark treatment.

From 1 July 2007, small businesses with aggregated annual turnover of less than \$2 million have been able to access this concession under the Small Business Framework.

<i>Legislative reference:</i>	Subsection 82KZL(1) of the <i>Income Tax Assessment Act 1936</i>							

A prepayment for services to be provided over a period of 10 years or more (for example, life membership) is evenly deducted over the first 10 years of that period.

Tax Expenditures Statement

The benchmark treatment of prepayments is that they are deductible over the period of the expenditure. The tax expenditure allows deductions to be spread over a shorter period and consequently it allows greater deductions in the first 10 years than the benchmark treatment.

B37 Deferral of profit from early sale of double wool-clips

<i>Commencement date:</i>	1961					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Sections 385-90 to 385-125 of the <i>Income Tax Assessment Act 1997</i>							

Primary producers who receive income from the forced disposal or death of livestock can elect to defer this income and use it to reduce the cost of replacement livestock within the next five income years. Alternatively, primary producers can elect to spread profits over the next four income years (or 10 years if the forced disposal was in relation to the control of bovine tuberculosis).

B39 Farm Management Deposit scheme

Agriculture, forestry and fishing (\$m)

<i>Commencement date:</i>	1999					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 393 of the <i>Income Tax Assessment Act 1997</i>							

The Farm Management Deposit (FMD) scheme allows primary producers (with no more than \$100,000 of non-primary production income) to defer their income tax liability. Primary producers are able to claim deductions for their FMD made in the year of deposit, with subsequent withdrawals being subject to assessment in the year of withdrawal. The FMD scheme has a maximum limit on deposits of \$400,000.

Primary producers can elect to pay tax at a tax rate based on their average income earned over the previous five income years. This provides a concession because, on balance, the saving from paying less tax in high income years outweighs additional tax paid in low income years.

B41 Spreading of insurance income for loss of timber or livestock

Agriculture, forestry and fishing (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>	Low							
<i>Commencement date:</i>	1 July 2001					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 40-230 of the <i>Income Tax Assessment Act 1997</i>							

If the value of a car used for income-producing purposes exceeds a certain amount ('car limit'), the amount of depreciation deductions that can be claimed is capped at the 'car limit'. This represents a negative tax expenditure as the full value of the car should be depreciated under the benchmark.

B44 Shipping — investment incentives

<i>Commencement date:</i>	1 July 2012					<i>Expiry date:</i>	30 June 2015	
<i>Legislative reference:</i>	Subdivision 61-N of the <i>Income Tax Assessment Act 1997</i>							

A refundable tax offset is available to qualifying companies that employ qualifying Australian seafarers until 1 July 2015.

As the refundable tax offset is an expense item, it does not appear as a tax expenditure in its own right. However, a tax expenditure arises because payments made under this arrangement are exempt from tax.

Venture capital fund managers may be paid a performance-based share of partnership profits by investors. Such performance payments are 'carried interests'. Under the benchmark, these entitlements are taxable income of the fund managers as they accrue. Instead, under the law, an entitlement to receive a carried interest is a capital gains tax event in the hands of venture capital fund managers and is not treated as income. Consequently, taxation of the income is deferred until the gains are realised and individual managers are eligible for the 50 per cent discount on their carried interest.

Under certain circumstances, 'profitability, insolvency or negative earnings conditions' do not preclude Upper Tier 2 perpetual subordinated debt and similar instruments from being classified as debt for tax purposes. This means that distributions on such instruments may be treated as tax deductible interest payments rather than non-tax deductible dividend payments. Perpetual subordinated debt issued by financial institutions to raise regulatory capital would typically be classified as equity under the debt-equity rules.

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 50-40 of the <i>Income Tax Assessment Act 1997</i>							

An income tax exemption applies to the income of industry-specific not-for-profit societies or associations predominantly devoted to promoting the development of aviation or tourism, or of agricultural, aquacultural, pastoral, horticultural, viticultural, manufacturing, fishing, or industrial resources of Australia. This expenditure includes the income tax exemption applying to not-for-profit societies or associations established for the purpose of promoting the development of Australian information and communication technology resources.

For those not-for-profit societies, associations or clubs to which the ‘mutuality principle’ applies, this tax expenditure exempts from income tax those amounts that are not already excluded by the ‘mutuality principle’. (For a brief explanation of the mutuality principle, refer to section A.3 of Appendix A.)

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subsection 23(6) of the <i>Income Tax Rates Act 1986</i>							

The rate of income tax payable by a not-for-profit company that has a taxable income not exceeding \$416 in a given income year is nil. Income tax is payable at a rate of 55 per cent on all income of not-for-profit companies that have a taxable income between \$416 and \$915.

This arrangement has the effect of providing an exemption from income tax for not-for-profit companies for the first \$416 of income, and then phasing in the ordinary corporate income tax rate of 30 per cent on all income, including the first \$416, when the company has income between \$416 and \$915. When a not-for-profit company has an income over \$915, the company tax rate is applied from the first dollar.

Note: estimates after 2013-14 are unquantifiable because of the high degree of uncertainty in the amount of franking credits that might be refunded in the future.

Generally, entities that are not subject to Australian tax cannot benefit from franking credits on distributions from Australian companies. However, entities that are endorsed as income tax exempt charities or income tax exempt deductible gift recipients are able to claim a refund of franking credits on distributions from Australian companies.

A solvency clause allows the issuer to defer payment if the payment would cause insolvency. These clauses do not preclude certain term subordinated notes from being classified as debt for tax purposes. The distributions on such notes may be treated as tax deductible interest payments rather than non-tax deductible dividend payments. Under the benchmark, term subordinated notes with solvency clauses would typically be classified as equity under the debt-equity rules.

<i>Legislative reference:</i>	Divisions 240 and 250 of the <i>Income Tax Assessment Act 1997</i> Division 42A of the <i>Income Tax Assessment Act 1936</i>							

A finance lease is, in substance, equivalent to a loan from the lessor to the lessee to finance the purchase of the leased asset. The lessor (financier) acquires the leased asset at the request of the lessee (borrower) and leases the asset to the lessee. On expiry of the lease, legal ownership of the asset is transferred to the lessee at minimal or no cost. During the term of the lease, while the lessor is the legal owner of the leased asset, the lessee has effective economic ownership through having control, use and enjoyment of the asset.

Except where specific provisions apply, for example, Divisions 240 and 250 of the *Income Tax Assessment Act 1997*, finance leases are taxed as leases rather than as loans. Given their economic substance, finance leases should be taxed as a loan from the lessor to the lessee to acquire the leased asset under the benchmark. That is, the interest payments should be deductible to the lessee and assessable to the lessor, and the lessee be able to claim depreciation deductions for the user cost of the leased asset.

Capital expenditure incurred in establishing horticultural plants can be written off using an accelerated depreciation regime, with deductions available from the first commercial season. The cost of establishing plants with an effective life of less than three years can be written off in the first commercial year. Plants with an effective life of more than three years can be depreciated over a shorter period than their effective life using the maximum write-off periods set out in the legislation.

B69 Three year write-off for expenditure on water facilities for primary producers

Agriculture, forestry and fishing (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	
	20	65	65	6	2	1	2	2	
<i>Tax expenditure type:</i>	Accelerated write-off					<i>2013 TES code:</i>		B82	
<i>Estimate reliability:</i>	Medium								
<i>Commencement date:</i>	23 May 1980					<i>Expiry date:</i>			
<i>Legislative reference:</i>	Subdivision 40-F of the <i>Income Tax Assessment Act 1997</i>								

Note: estimates include tax expenditures B69, B66 and B70

Primary producers can claim a deduction for capital expenditure on water facilities over three years. Water facilities include dams, earth tanks, underground tanks, concrete or metal tanks, tank stands, bores, wells, irrigation channels or similar improvements, pipes, pumps, water towers, and windmills. One-third of the

expenditure is deductible in the income year in which it is incurred, and one-third is deductible in each of the following two years. The expenditure must be incurred primarily for conserving and conveying water for use in primary production.

B70 Water facilities and landcare concession for irrigation water providers

Agriculture, forestry and fishing (\$m)

<i>Tax expenditure type:</i>	Deduction					<i>2013 TES code:</i>	B83	
<i>Estimate reliability:</i>								
<i>Commencement date:</i>	1 July 2004					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivisions 40-F and 40-G of the <i>Income Tax Assessment Act 1997</i>							

Certain irrigation water providers can claim an immediate deduction for capital expenditure on landcare activities and can claim a deduction for capital expenditure on water facilities over three years. This aligns the deductions available to primary producers and businesses using rural land with deductions available to irrigation water providers which supply those primary producers and businesses with water.

B71 Absence of depreciation recapture for certain assets

Mining, manufacturing and construction (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1982					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 43 and Section 110-45 of the <i>Income Tax Assessment Act 1997</i>							

Certain buildings and structures receive deductions that are not recaptured by balancing adjustment on disposal of the asset. This tax expenditure is offset by reductions in the capital gains tax cost base of the assets concerned.

B72 Exploration and prospecting deduction

Mining, manufacturing and construction (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>	Medium							
<i>Commencement date:</i>	1968					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 40-25, subsection 40-80(1), subsection 40-95(12) and section 40-730 of the <i>Income Tax Assessment Act 1997</i>							

Expenditure on exploration or prospecting for the purpose of mining (including for petroleum) and quarrying is immediately deductible. In addition, the cost of a depreciating asset is immediately deductible if the taxpayer first uses the asset for

exploration or prospecting for minerals (including petroleum) or quarry materials obtainable by mining operations, subject to certain conditions. However, the cost of a mining, quarrying or prospecting right or information first used for exploration is generally deductible over its effective life or 15 years, whichever is shorter.

B73 Statutory effective life caps

Transport and communication (\$m)

2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>	Medium - Low						
<i>Commencement date:</i>	2002				<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 40-102 of the <i>Income Tax Assessment Act 1997</i>						

Statutory effective life caps provide a shorter write-off period for some assets, where the cap is below the effective life determined by the Commissioner of Taxation. Statutory caps exist for assets such as aircraft, trucks, truck trailers, buses, tractors and harvesters.

B74 Accelerated depreciation for software

Other economic affairs - Other economic affairs, nec (\$m)

2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1998				<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivisions 40-B and 40-E of the <i>Income Tax Assessment Act 1997</i>						

Expenditure on acquiring software is depreciated over a statutory effective life of four years, rather than an effective life that is self-assessed by the taxpayer or that is determined by the Commissioner of Taxation. Expenditure incurred on developing software may be allocated to a software development pool and deducted over four years, enabling a deduction to be claimed during development and before completion.

From 1 July 2015, the effective life will be increased to five years, which is consistent with the benchmark treatment.

B75 Capital works expenditure deduction

Other economic affairs - Other economic affairs, nec (\$m)

2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>		Low					
<i>Commencement date:</i>		21 August 1979			<i>Expiry date:</i>		
<i>Legislative reference:</i>		Division 43 of the <i>Income Tax Assessment Act 1997</i>					

A taxpayer can claim a deduction for capital works expenditure over a period that is generally shorter than the effective life of the asset. Capital works can be deducted at either 2.5 per cent (over 40 years) or 4 per cent (over 25 years) of the construction expenditure, depending on when construction started and how the capital works are used.

<i>Commencement date:</i>		1952			<i>Expiry date:</i>		
<i>Legislative reference:</i>		Section 40-340 of the <i>Income Tax Assessment Act 1997</i>					

'Balancing adjustments' arise when the disposal value of a depreciating asset exceeds its depreciated value. The tax liability for such balancing adjustments can be deferred where the balancing adjustment arises from certain changes in ownership, such as disposal as a result of a marriage breakdown. The transferee is taken to acquire the asset at the written down value and must depreciate the asset in the same way as the transferor.

B77 Depreciation pooling for low value assets

Other economic affairs - Other economic affairs, nec (\$m)

2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>		Medium					
<i>Commencement date:</i>		2000			<i>Expiry date:</i>		
<i>Legislative reference:</i>		Subdivision 40-E of the <i>Income Tax Assessment Act 1997</i>					

Assets costing less than \$1,000 can be written off at the declining balance rate of 37.5 per cent through a low value asset pool. Once a taxpayer elects to create a low value pool, all assets that cost less than \$1,000 are subject to the declining balance rate treatment.

B78 Depreciation to nil value rather than estimated scrap value

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1936					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 40 of the <i>Income Tax Assessment Act 1997</i>							

Taxpayers are entitled to write-off the cost of depreciating assets to zero value, rather than to the estimated disposal value of the asset. Any gain on disposal of the asset is assessed as income at the time of disposal through a balancing adjustment. This results in a tax deferral.

B79 Research and development — exemption of refundable tax offset

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Tax expenditure type:</i>	Exemption, Denial of deduction					<i>2013 TES code:</i>	B96	
<i>Estimate reliability:</i>	Medium - Low							
<i>Commencement date:</i>	1 July 2011					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 355 of the <i>Income Tax Assessment Act 1997</i>							

The research and development (R&D) refundable tax offset is available to companies with a turnover of less than \$20 million at a rate of 43.5 per cent of expenditure on eligible R&D activities for income years beginning from 1 July 2014. For previous income years, the refundable tax offset rate is 45 per cent.

If a taxpayer's income tax liability is reduced to zero, the unused refundable tax offset amount can be applied to reduce other tax liabilities. Any residual unused amounts can be refunded as cash to the company.

Companies that claim the R&D refundable tax offset are unable to claim deductions for the R&D expenditure. The absence of these deductions constitutes a negative tax expenditure and explains why the estimates are negative.

B80 Research and development — non-refundable tax offset

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Tax expenditure type:</i>	Offset					<i>2013 TES code:</i>		B98
<i>Estimate reliability:</i>	Low							
<i>Commencement date:</i>	2011					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 355 of the <i>Income Tax Assessment Act 1997</i>							

The R&D non-refundable tax offset was available at a rate of 40 per cent for eligible R&D expenditure up to 30 June 2014. The offset is now available at a rate of 38.5 per cent with effect from 1 July 2014.

The non-refundable tax offset can be carried forward to be applied against future income tax liabilities. If a company's income tax liability is zero, unused offset amounts cannot be applied to reduce other tax liabilities.

Companies with an annual aggregated assessable income of \$20 billion or more are not eligible for the offset for income years beginning on or after 1 July 2014.

B81 Small business — simplified depreciation rules

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>	Medium - Low							
<i>Commencement date:</i>	2007					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivision 328-D of the <i>Income Tax Assessment Act 1997</i>							

Small business entities with an aggregated annual turnover of less than \$2 million are able to access concessional depreciation arrangements for business assets. Under the concessions, small business entities can immediately write-off (deduct) assets that cost less than \$1,000. Assets above \$1,000 are depreciated through simplified pooling arrangements at a rate of 30 per cent (15 per cent in the first year). The general small business pool can be immediately deducted at the end of the income year if its value is less than \$1,000 (before deducting depreciation for the year).

B82 Small business — simplified trading stock rules

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	2007					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 328 of the <i>Income Tax Assessment Act 1997</i>							

Small businesses with annual turnover of less than \$2 million may choose to use a simplified trading stock regime. Under this regime, in certain circumstances, changes in the value of trading stock do not have to be accounted for and stocktaking is not required at the end of the income year.

B83 International tax — concessional rate of final withholding tax on certain distributions by Australian managed investment trusts to foreign residents

General public services - General services (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1 July 2008					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivision 12-H of Schedule 1 to the <i>Taxation Administration Act 1953</i> Division 7 of the <i>Taxation Administration Regulations 1976</i>							

Note: estimates include tax expenditures B83 and B17

Distributions of Australian source net income (other than dividends, interest and royalties) by Australian managed investment trusts to foreign residents are subject to a final withholding tax. The general rate of 30 per cent is reduced to 7.5 per cent for 1 July 2010 to 30 June 2012, and to 15 per cent from 1 July 2012, for residents of countries specified in the regulations.

<i>Commencement date:</i>	1 July 2005					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 974 of the <i>Income Tax Assessment Act 1997</i>							

From 1 July 2005, related party at call loans, which would generally give rise to an equity interest, are taken to be debt interests for companies that have an annual turnover of less than \$20 million. Therefore, payments on the loan are deductible debt interest whereas they are treated as a non-deductible equity interest under the benchmark.

B85 Forestry managed investment schemes — tax deductibility

Other economic affairs - Other economic affairs, nec (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1 July 2007					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 394 of the <i>Income Tax Assessment Act 1997</i>							

Investors in forestry managed investment schemes are able to claim immediate upfront deductions for their expenditure on such schemes, provided that, amongst other requirements, at least 70 per cent of the expenditure is directly related to developing forestry.

C. RETIREMENT SAVINGS

C1 Concessional taxation and exemption of certain personal superannuation contributions

Social security and welfare (\$m)

2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

Estimate reliability: Medium

Commencement date: Introduced before 1985 *Expiry date:*

Legislative reference: Divisions 290, 291 and 295 of the *Income Tax Assessment Act 1997*

Employer contributions, up to the concessional contributions caps, are included in the assessable income of a superannuation entity and taxed at a concessional rate of 15 per cent. For individuals with income greater than \$300,000, the effective rate is 30 per cent.

C4 Concessional taxation of lump sum payments for unused recreation and long service leave

Social security and welfare (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	Introduced before 1985				<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivisions 83-A and 83-B of the <i>Income Tax Assessment Act 1997</i>						

A maximum tax rate of 30 per cent plus the Medicare levy applies to lump sum payments in lieu of unused long service or annual leave which accrued before 18 August 1993, or which are made in circumstances of bona fide redundancy, invalidity or under an early retirement scheme.

C5 Concessional taxation of non-superannuation termination benefits

Social security and welfare (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

Non-superannuation termination payments, known as employment termination payments (ETPs), are taxed differently to lump sums paid from untaxed superannuation funds. Genuine redundancy and early retirement scheme payments made to people under 65 years of age are also tax free up to a limit, and amounts in excess of this limit are taxed as an ETP.

C6 Concessional taxation of superannuation entity earnings

Social security and welfare (\$m)							
2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	Introduced before 1985				<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 295 of the <i>Income Tax Assessment Act 1997</i>						

The tax rate on earnings for complying superannuation entities is 15 per cent (accumulation phase) or nil where the earnings are derived from assets which are used to meet current pension liabilities (drawdown phase). Complying superannuation entities are entitled to refunds of excess imputation credits attached to dividends payable to them.

A complying superannuation entity is one that has elected to be regulated and has complied with certain prudential requirements in the *Superannuation Industry (Supervision) Act 1993*.

C7 Concessional taxation of unfunded superannuation

<i>Estimate reliability:</i>	Medium								
<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>			
<i>Legislative reference:</i>	Part 3-30 and Subdivision 320-D of the <i>Income Tax Assessment Act 1997</i> Part 3-30 of the <i>Income Tax (Transitional Provisions) Act 1997</i>								

In the case of unfunded superannuation, no employer contributions are made until the benefit is provided on the member's retirement. The appropriate benchmark treatment of these amounts is taxation at personal rates on receipt by the member.

Unfunded superannuation lump sums are taxed in the same way as funded superannuation lump sums from untaxed funds (see C13). Similarly, unfunded superannuation income streams are taxed in the same way as funded superannuation income streams from untaxed funds (see C12). The tax treatment of a death benefit paid to a dependant as an income stream depends on the age of the fund member and the dependant. If either was aged 60 or over at the time of death, then the taxable component of payments to the dependant will be taxed at marginal rates with a 10 per cent tax offset. If both were under age 60 at the time of death, the taxable component of the pension will be taxed at the dependant's marginal rate and will become eligible for the 10 per cent offset once the dependant reaches age 60.

C8 Concessional taxation of unused long service leave accumulated prior to 15 August 1978

Social security and welfare (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>			
<i>Legislative reference:</i>	Subsection 83-80(1) of the <i>Income Tax Assessment Act 1997</i>								

A reduced tax rate applies to lump sum payments for unused long service leave which accrued prior to 15 August 1978. Five per cent of such payments is included in the taxpayer's assessable income and is subject to tax at marginal rates.

<i>Commencement date:</i>	Co-contribution introduced 1/7/2003. Low income superannuation contribution introduced 1/7/2012.					<i>Expiry date:</i> Low income superannuation contribution ends 30/6/2017. Co-contribution is ongoing.		
<i>Legislative reference:</i>	<i>Superannuation (Government Co-Contribution for Low Income Earners) Act 2003</i>							

The Superannuation Co-contribution and the Low Income Superannuation Contribution are Government payments that increase the retirement savings of eligible low-income taxpayers – they are not taxed. In addition, an 18 per cent tax offset is available for post-tax contributions to the superannuation account of a low income spouse. A maximum offset of \$540 applies for a \$3,000 contribution and is phased out once the spouse's income exceeds \$13,800.

<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Divisions 301 and 302 and Part 3-30 of the <i>Income Tax Assessment Act 1997</i> Part 3-30 of the <i>Income Tax (Transitional Provisions) Act 1997</i>							

Superannuation income stream payments from a taxed source are tax free for persons aged 60 and over. The taxable component of superannuation income stream payments from a taxed source to persons below age 60 is included in assessable income, and the tax paid on this amount creates negative tax expenditures because benefits are untaxed under the superannuation benchmark. Similarly, a death benefit paid from a taxed source as a reversionary pension to a beneficiary aged under 60 is taxed. Some offsets reduce the amount of tax paid, for instance a 15 per cent tax offset applies to the taxable component of superannuation income stream benefits paid to persons aged 55 to 59, and to disability benefits paid to persons of any age.

The taxable component of superannuation income stream payments from an untaxed source is included in the recipient's assessable income. A 10 per cent tax offset applies to the taxable component of pension payments for persons aged 60 and over.

C13 Tax on funded superannuation lump sums

Social security and welfare (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Tax expenditure type:</i>	Increased rate					<i>2013 TES code:</i>		C12
<i>Estimate reliability:</i>	Medium							
<i>Commencement date:</i>	Introduced before 1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Divisions 301, 302 and 307 and Part 3-30 of the <i>Income Tax Assessment Act 1997</i> Part 3-30 of the <i>Income Tax (Transitional Provisions) Act 1997</i>							

The tax raised on lump sum payments results in negative tax expenditures because the benchmark treatment of savings applies marginal personal income tax rates to contributions and earnings, while benefits are tax free.

For a person aged 55 to 59, the tax rate on the taxable component of a lump sum above the cap amount, paid from a taxed fund is 15 per cent. For a person below age 55 a maximum tax rate of 20 per cent applies.

The taxable component of lump sums paid from untaxed funds to persons aged 60 or over is taxed at a maximum rate of 15 per cent up to an (indexed) amount and at the top marginal rate thereafter. For persons aged 55 to 59, the tax rate ranges from 15 per cent up to the top marginal rate, while for persons under age 55 the tax rate is typically 30 per cent.

Special arrangements apply to lump sums paid to certain temporary residents who have departed Australia, while death benefit payments to non-dependants are taxed at a maximum rate of 15 per cent where paid from a taxed source, and at a maximum rate of 30 per cent where paid from an untaxed source.

<i>Commencement date:</i>	1 July 2007					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivision 83-D of the <i>Income Tax Assessment Act 1997</i>							

Termination payments paid as a result of the termination of foreign employment are non-assessable and non-exempt income. Non-assessable and non-exempt income is income on which you do not need to pay tax (however, this type of income may be taken into account for other purposes). To be non-assessable and non-exempt, the payment must have been paid to a taxpayer who was a foreign resident during the period to which the payment relates. Where the taxpayer was an Australian resident for some of the period to which the termination payment relates, the payment will be non-assessable and non-exempt if it was received in consequence of the termination of a period of employment or engagement for the purposes of section 23AF or section 23AG and the payment relates only to that period of employment or engagement. This does not apply if the payment is a superannuation benefit or a pension or annuity.

<i>Commencement date:</i>	15 June 2000					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Section 104-47 of the <i>Income Tax Assessment Act 1997</i>							

For CGT purposes, perpetual conservation covenants are treated as a part disposal of land, rather than the creation of a right. This treatment results in a reduced capital gain because a portion of the cost base of the land is taken into account. Landowners can also benefit from any CGT concession or exemption that may apply to the capital gain.

<i>Commencement date:</i>	1999					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 115 of the <i>Income Tax Assessment Act 1997</i>							

Capital gains or losses on the disposal of an individual's main residence and up to two hectares of adjacent land are exempt from CGT, to the extent the dwelling is used as a home.

Disposals of other assets by individuals or trusts receive a CGT exemption applying to 50 per cent of any nominal gain where the asset has been owned for at least 12 months.

The CGT treatment of the main residence effectively provides a 100 per cent exemption. Conceptually, this can be split into a component reflecting the 50 per cent discount provided to disposals of non-main residence assets and a 'top up' component that brings the concession up to 100 per cent.

See tax expenditure E5 for the remainder of the value of the CGT main residence exemption. See tax expenditure E11 for detail on the 50 per cent discount applying to other assets.

<i>Legislative reference:</i>	Sections 118-145, 118-195 and 118-200 of the <i>Income Tax Assessment Act 1997</i>							

A taxpayer's dwelling may continue to be treated as their main residence even if it ceases to be their main residence for up to six years, if the dwelling is used to produce assessable income; or indefinitely, if the dwelling is not used to produce assessable income. This is provided that no other dwelling is treated as the taxpayer's main residence during the period of absence.

In addition, a taxpayer who receives a dwelling as beneficiary of a deceased estate, or who owns the dwelling as the trustee of a deceased estate, may be able to disregard a capital gain or loss if certain conditions are met.

<i>Legislative reference:</i>	Subdivision 768-G of the <i>Income Tax Assessment Act 1997</i>							

Capital gains and losses by Australian companies and controlled foreign companies arising from certain CGT events related to non-portfolio interests in foreign companies with active business assets are reduced. The reduction reflects the degree to which the assets of the foreign company are used in active business. The concession applies where the Australian company holds a direct voting percentage of 10 per cent or more in the foreign company throughout a 12 month period.

<i>Legislative reference:</i>	Division 125 of the <i>Income Tax Assessment Act 1997</i> Subsection 44(4) of the <i>Income Tax Assessment Act 1936</i>							

Concessions are available to defer or exempt the CGT payable in respect of the restructuring of a corporate or trust group, where the group is split into two or more entities or groups (that is, by demerging). There are three elements to demerger relief:

- CGT roll-over at the shareholder or trust membership interest level for interests such as shares that are exchanged during the demerger process;
- a CGT exemption for certain capital gains and losses at the entity level; and
- an income tax exemption for certain 'demerger dividends'.

<i>Commencement date:</i>	1985					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Division 128 of the <i>Income Tax Assessment Act 1997</i>							

There is no CGT taxing point when a taxpayer dies. Recognition of the gains or losses accruing during the life of the deceased is deferred until the person inheriting the CGT asset later disposes of it. An exception applies if the asset passes to an exempt entity, the trustee of a complying superannuation entity, or a foreign resident.

The luxury car tax currently applies to cars that have a GST-inclusive price over \$61,884 (the luxury car tax threshold for the 2014-15 financial year). The luxury car tax is 33 per cent of the GST-exclusive value of the car that exceeds the luxury car tax threshold. As motor vehicle purchases are not taxed under the benchmark, the luxury car tax is a negative tax expenditure.

'Primary producers' or certain tourism businesses that acquire a 'refund-eligible car' after 30 June 2008 are eligible to claim a tax refund of up to \$3,000 of the amount of luxury car tax paid.

Tax Expenditures Statement

From 3 October 2008 a higher luxury car tax threshold has applied to fuel efficient cars. Eligible fuel efficient cars are subject to a threshold of \$75,375 for luxury car tax purposes (for the 2014-15 financial year).

<i>Estimate reliability:</i>	Medium							
<i>Commencement date:</i>	15 March 1956					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Item 10 of the Schedule to the Excise Tariff Act 1921							

Aviation gasoline and aviation turbine fuel are subject to a lower rate of excise than the benchmark rate. From 1 July 2012 to 30 June 2014, the excise rate included a 'carbon component rate', which was determined by the emission factor of each fuel and the carbon price. The inclusion of a carbon component of excise reduced the value of the concessional rate of excise. From 1 July 2014, the value of the concession increased due to the removal of the carbon component.

<i>Estimate reliability:</i>		Low					
<i>Commencement date:</i>		1985			<i>Expiry date:</i>		
<i>Legislative reference:</i>		Excise Tariff Act 1921					

The benchmark rates for alternative fuels vary depending on energy content. The bio-fuels (ethanol and biodiesel) fuel tax rate is the same as that for petrol and diesel rate. This gives rise to a negative tax expenditure for ethanol which is taxed at a higher rate than its benchmark. There is no tax expenditure for biodiesel as it is taxed at its benchmark rate.

From 1 July 2015, domestically produced ethanol and biodiesel will have their rates of duty reduced to zero. Each 1 July thereafter, domestically produced ethanol and biodiesel will have their rates of duty increased (in addition to indexation) until the rate of duty reaches energy content equivalency, discounted by 50 per cent. Ethanol Production Grants and Cleaner Fuels Grants will cease to be paid from 1 July 2015.

The fuel tax on liquefied petroleum gas, liquefied natural gas and compressed natural gas began to be phased-in from 1 December 2011. The initial rates of excise applying to these fuels have been progressively increasing each year until the final excise rate is reached on 1 July 2015, to reflect a tax rate discount of 50 per cent of each fuel's respective benchmark fuel tax rate. This gives rise to a positive tax expenditure for these fuels, as they will be taxed at a lower rate than their respective benchmark rates.

Users of small, non-commercial scale, domestically-based compressed natural gas refuellers are exempt from paying excise duty on compressed natural gas used to fuel their vehicles.

<i>Commencement date:</i>	1 July 2012					<i>Expiry date:</i>		
<i>Legislative reference:</i>	<i>Petroleum Resource Rent Tax Assessment Act 1987</i>							

Under the natural resource benchmark, crude oil excise is treated as a prepayment of Petroleum Resource Rent Tax (PRRT) liabilities and to the extent that the crude oil excise exceeds the PRRT payable in a year, a negative tax expenditure will arise for that period. Where crude oil excise credits are carried forward and used to reduce PRRT in later periods, a tax expenditure will arise in the year the carried forward credit is utilised.

G2 PRRT — denial of refund of tax credits for losses at project end

Fuel and energy (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1 July 1990					<i>Expiry date:</i>		
<i>Legislative reference:</i>	<i>Petroleum Resource Rent Tax Act 1987</i>							

There is no refund of the tax value of losses available when a project closes down. This treatment is consistent with the benchmark prior to 1 July 2012 but gives rise to a tax expenditure under the benchmark applying from 1 July 2012.

G3 PRRT — expenditure uplift rate

Fuel and energy (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	1 July 1990					<i>Expiry date:</i>		
<i>Legislative reference:</i>	<i>Petroleum Resource Rent Tax Act 1987</i>							

Expenditure that generates project losses is uplifted at a number of different rates depending on when the expenditure took place and the nature of the expenditure. For example exploration expenditure is uplifted at the long term bond rate plus 15 percentage points and general expenditure is uplifted at the long term bond rate plus 5 percentage points. These uplift rates are beyond the appropriate benchmark rate of the long term bond rate.

G4 PRRT — gas transfer price regulations

Fuel and energy (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Commencement date:</i>	20 December 2005					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Petroleum Resource Rent Tax Assessment Regulations 2005							

The PRRT gas transfer price regulations stipulate rules for calculating the gas transfer price where there is no arm’s length transaction. The regulations provide an allowance for capital expenditure which is based on the long term bond rate plus 7 percentage points rather than the benchmark rate which is the long term bond rate. The regulations also provide further concessions in the calculation of the gas transfer price by reducing the estimated upstream gas price by half the difference between the estimated of ‘upstream’ price and the estimated ‘downstream’ price where the upstream price is the higher.

G5 PRRT — starting base and uplift rate for capital assets

Fuel and energy (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Tax expenditure type:</i>	Deduction					<i>2013 TES code:</i>	G12	
<i>Estimate reliability:</i>	Not Applicable					<i>* Category</i>	2+	
<i>Commencement date:</i>	1 July 2012					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Petroleum Resource Rent Tax Assessment Act 1987							

Existing investments of projects brought under the PRRT on 1 July 2012 are recognised through the provision of a starting base allowance. The starting base allowance recognises assets relating to the upstream assets of the PRRT project on 2 May 2010. Unused starting base losses are uplifted at the long term bond rate plus 5 percentage points. Unused exploration expenditure under the look back valuation option is uplifted at long term bond rate plus 15 percentage points.

H. GOODS AND SERVICES TAX

H1 Financial supplies — financial acquisitions threshold - input tax credits

General public services - Financial and fiscal affairs (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Tax expenditure type:</i>	Concessional rate					<i>2013 TES code:</i>		H1
<i>Estimate reliability:</i>	Not Applicable					<i>* Category</i>		3+
<i>Commencement date:</i>	1 July 2000					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Sections 11-15(4) and 189-5 of the <i>A New Tax System (Goods and Services Tax) Act 1999</i>							

Generally, financial supplies are not subject to GST and input tax credits cannot be claimed for such supplies. However, entities that make financial supplies without exceeding the financial acquisitions threshold are entitled to input tax credits for acquisitions used or intended to be used for making the financial supplies.

An entity does not exceed the financial acquisitions threshold if the input tax credits it would have been entitled to for the acquisitions do not exceed \$150,000 or 10 per cent of their total input tax credits for the year.

H2 Financial supplies — input taxed treatment

General public services - Financial and fiscal affairs (\$m)

	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18

<i>Estimate reliability:</i>	Medium							
<i>Commencement date:</i>	1 July 2000					<i>Expiry date:</i>		
<i>Legislative reference:</i>	Subdivision 40-A of the <i>A New Tax System (Goods and Services Tax) Act 1999</i>							

Generally, financial supplies are not subject to GST and input tax credits cannot be claimed for such supplies. For example, banks do not charge GST on the supply of bank accounts to customers, and cannot claim back the GST component of the costs they incur in supplying bank accounts. A positive tax expenditure arises in this situation as the GST paid is less than 10 per cent of the final value of the financial supply.

A negative tax expenditure arises where the financial supply is to a business. This is because no GST would actually be payable under the benchmark (subjecting financial services to GST) in this situation as businesses would claim an input tax credit for the GST amount. However, under actual tax arrangements, some GST is paid as input tax credits cannot be claimed on financial supplies to businesses.

H3 Financial supplies — reduced input tax credits

<i>Legislative reference:</i>		Division 70 of the A New Tax System (Goods and Services Tax) Act 1999					

Generally, financial supplies are not subject to GST and input tax credits cannot be claimed for such supplies. However, input tax credits may be claimed for the acquisition of certain supplies (known as reduced credit acquisitions), but at a reduced rate (either 55 or 75 per cent of the standard input tax credit entitlement depending on the acquisition).

H4 Charitable institutions and non-profit bodies

General public services - General services (\$m)

<i>Legislative reference:</i>		Subdivision 38-G of the A New Tax System (Goods and Services Tax) Act 1999					

Charities and other gift deductible bodies are entitled to a higher GST registration threshold of \$150,000. They are entitled to GST-free treatment on non-commercial activities, certain retirement village services, bingo, and sale of second hand goods. Charities can elect to have fund raising treated as input taxed. This option is also available to gift deductible entities and government schools. Simplified accounting methods may be available and a range of other concessions apply.

Certain entities have the option of separately identifying some or all of their operations and treating each as a separate entity for GST purposes.

The Commissioner of Taxation can create simplified accounting methods (SAMs) that some small businesses can choose to apply to reduce their GST compliance costs. SAMs allow taxpayers to apply simple ratios to calculate their GST liabilities (or components of them) rather than accounting for each supply to determine if it is taxable or non-taxable. Being ratios, SAMs will benefit some taxpayers by reducing their GST liabilities while increasing the GST liabilities of others, relative to the amounts calculated using a full GST calculation.

While SAMs are designed to reduce compliance costs rather than provide a tax concession, entities that expect to receive a tax benefit from applying SAMs are more likely to adopt this methodology than those that do not. This would be expected to result in a net tax concession.

The first supply of a precious metal (after its refining by or on behalf of the supplier) to a precious metal dealer is GST-free. Subsequent supplies of precious metals are input taxed. The importation of precious metals is a non-taxable importation and GST is not charged on the importation. The tax expenditure here is the loss of tax on the GST-free and input taxed supplies and imports (where this would not be offset by input tax credits) reduced by any input tax credits denied for acquisitions related to the input taxed activities.

Food and beverages subject to GST include: restaurant and takeaway meals, confectionary, ice cream, biscuits and soft drinks.

CHAPTER 3: REVENUE GAIN ESTIMATES OF TAX EXPENDITURES

3.1 Introduction

The revenue gain approach is an alternative to the revenue forgone approach used to produce the tax expenditure estimates in Chapter 2. Revenue gain estimates for individual tax expenditure items are more akin to estimates of the revenue impact of budget measures.

Consistent with a recommendation of the Australian National Audit Office in its 2007-08 performance audit of the TES,² this Chapter reports revenue gain estimates for 10 large tax expenditures.³

- These tax expenditures have been chosen because they best illustrate the considerable differences between the revenue forgone and revenue gain approaches, and how those differences can vary between tax expenditure items.

Estimates for the revenue gain from the CGT concessions for housing and the CGT discount for individuals and trusts have not been quantified because those estimates are either very small and uncertain (housing) or because of the significant uncertainty regarding the magnitude of response effects to a change (CGT discount).

Revenue gain estimates should be treated with caution.

- They assume that a tax expenditure is abolished, which may be implausible in many cases.
- In practice, the revenue gain can be difficult to estimate as there is usually little, if any, information on how taxpayers might react to the removal of a tax expenditure. Assumptions about taxpayer behavioural responses therefore need to be made, and these assumptions can be difficult to meaningfully substantiate.
- Judgments also need to be made about likely policy settings – for example, whether it is realistic to assess the abolition of a single tax expenditure (for example, a particular GST exemption) while keeping other tax expenditures unchanged (for example, other GST exemptions).

2 ANAO Audit Report No. 32, 2007-08, *Preparation of the Tax Expenditures Statement*, Recommendation 5.

3 Ranked according to their revenue forgone estimates.

3.2 Standard assumptions for the revenue gain estimates

The tax expenditures listed below have been estimated using both the revenue gain and revenue forgone approaches. The revenue gain estimates all assume that the tax expenditures:

- are removed with effect from 1 July 2014;
- apply prospectively to transactions entered into after that date; and
- include other specific assumptions concerning likely policy specifications for the removal of each concession as set out in the description.

The revenue gain estimates also incorporate the impact of direct behavioural responses from the change where these are expected to have a significant impact on the estimates. The revenue gain estimates do not include any allowance for second round effects (that is, those arising from the flow-on of a change, beyond those directly affected, into the wider economy) because of the considerable uncertainty regarding the magnitude and timing of such impacts.

3.3 Guide to revenue gain estimate descriptions

The descriptions of the revenue gain estimates in this chapter present the revenue forgone and revenue gain estimates for a four year period for comparison. A brief outline of the reasons for any difference in the estimates is then provided.

<i>Reference code</i> A Personal income B Business income C Retirement income D Fringe benefits tax E Capital gains tax F Commodity tax G Natural resource taxes H Goods and services tax		Tax expenditure title		<i>Tax expenditure estimates</i> - nil .. not zero, but rounded to zero * estimate is not available

3.4 Tax expenditures based on revenue gain approach

C3: Concessional taxation of employer superannuation contributions								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	16,300	17,350	18,100	19,050	15,550	16,450	17,150	18,100
Reason for difference	Broadly, the revenue gain approach yields a lower estimate of the tax expenditure because it incorporates a likely behavioural response, with removal of the concessional taxation of superannuation leading to reduced superannuation contributions. It is assumed that the Superannuation Guarantee remains and therefore compulsory contributions continue. Voluntary contributions are assumed to be directed to alternative tax preferred investments.							
C6: Concessional taxation of superannuation entity earnings								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	13,400	16,150	21,600	26,800	11,750	13,700	18,250	22,450
Reason for difference	Broadly, the revenue gain approach yields a lower estimate of the tax expenditure because it incorporates a likely behavioural response, with removal of the concessional taxation of superannuation leading to reduced superannuation contributions (and lower balances). It is assumed current preservation rules remain. In the accumulation phase voluntary concessional contributions are assumed to cease (as in C3) and most non-concessional contributions are also not invested in superannuation after the start date. Over time this reduces the superannuation asset base and thus the revenue gain on withdrawing the earnings tax concession. Additionally, a significant proportion of funds in the retirement phase (not preserved) are withdrawn. Because of other tax concessions for older Australians (particularly the Senior Australians and Pensioner Tax Offset), the funds withdrawn attract minimal tax in the new investments chosen.							
H28: GST — Food								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	6,400	6,700	7,000	7,300	6,300	6,600	6,800	7,100
Reason for difference	Removing the GST exemption applicable to certain types of food would be expected to decrease demand for those items. However, the impact of this behavioural response is expected to be small as demand for GST-free food is likely to be relatively unresponsive to changes in price.							
H16: GST — Education								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	3,950	4,300	4,700	5,150	3,550	3,850	4,250	4,600
Reason for difference	Removing the GST exemption for education would be expected to decrease demand for education services. This is primarily due to an expected fall in demand for private education and 'discretionary courses'.							

H2: GST — Financial supplies - input taxed treatment								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	3,550	3,750	3,950	4,150	3,550	3,750	3,950	4,150
Reason for difference	Removing the input taxed treatment of financial services is not expected to materially impact the demand for these services. This is because of the relatively small increase in the price of financial services that would result from applying the normal GST rules and the lack of substitutable services that are available.							
H19: GST — Health - medical and health services								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	3,550	3,800	4,100	4,400	3,500	3,750	4,050	4,350
Reason for difference	Removing the GST exemption for medical and health services would be expected to decrease demand for those services. However, the impact of this behavioural response is expected to be small as demand for medical and health services is likely to be relatively unresponsive to changes in price.							
C5: Concessional taxation of non-superannuation termination benefits								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	2,700	1,950	1,900	1,900	2,700	1,950	1,900	1,900
Reason for difference	As this tax expenditure relates to termination of employment (including cases such as redundancy), it is expected that employees would have limited capacity to alter their employment status if the tax treatment changed. As a result there is expected to be no material difference between the revenue forgone and revenue gain estimates.							
F24: Customs duty								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	-2,550	-1,490	-1,250	-1,230	-2,550	-1,490	-1,250	-1,230
Reason for difference	Under the customs duty benchmark, goods imported into Australia are free from customs duty except to the extent that the duty is equivalent to taxes imposed on domestically produced goods. Bringing the customs duty tax expenditure in line with the benchmark would remove the revenue currently collected from tariffs on imports (which is reported as a negative tax expenditure). While the change may increase demand for imported goods, this would have no impact on customs duty revenue once the tax rate has been reduced to zero.							
A38: Exemption of Family Tax Benefit payments								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	2,220	2,170	2,110	2,040	2,220	2,170	2,110	2,040
Reason for difference	Removing the exemption of Family Tax Benefit, Parts A and B could be expected to result in a change in labour force participation; however, the size of the effect is uncertain and has not been quantified. As a result there is no difference between the revenue forgone and revenue gain estimates.

B14: Exemption from interest withholding tax on certain securities								
Estimates	Revenue forgone estimate (\$m)				Revenue gain estimate (\$m)			
	2014-15	2015-16	2016-17	2017-18	2014-15	2015-16	2016-17	2017-18
	1,860	1,860	1,860	1,860	1,310	1,370	1,290	1,280
Reason for difference	Removing the exemption from interest withholding tax on certain securities would be expected to result in some borrowers switching to other forms of exempt borrowings, resulting in no revenue gain. In addition, some interest payments may be increased to cover the tax, leading to increased income tax deductions.							

APPENDIX A: TECHNICAL NOTES

A.1 Reliability and unquantifiable tax expenditures

RELIABILITY OF ESTIMATES

Tax expenditure estimates vary in reliability depending on the quality, detail and frequency of the underlying data; the extent to which calculations are based on assumptions; the sensitivity of the results to those assumptions and whether future taxpayer behaviour is reasonably predictable. In addition, unexpected changes in economic conditions or volatility in markets may influence the future value of tax expenditures, thus affecting the reliability of tax expenditures projections.

The reliability of each tax expenditure estimate (where quantified) has been assessed by separately scoring:

- the reliability of the data;
- the underlying assumptions; and
- other relevant factors (for example, the volatility of growth rates over time).

Scores range from 0 (very low) to 3 (high). The three scores are then summed to give an overall reliability rating as set out below.

Score	Rating
0	Very low
1	Low
2	Low
3	Low
4	Medium - low
5	Medium
6	Medium
7	Medium
8	Medium - high
9	High

The reliability of quantified tax expenditures in the 2014 TES is shown in Table A1.

Table A1: Reliability of quantified tax expenditures for 2014-15

Reliability rating	Number of tax expenditures
High	4
Medium — high	16
Medium	66
Medium — low	18
Low	43
Very low	5

UNQUANTIFIABLE TAX EXPENDITURES — ORDERS OF MAGNITUDE

In many cases there is insufficient data to produce a reliable estimate for a tax expenditure item. In these cases, the estimate will be shown as being unquantifiable or 'not available'. In the 2014 TES, estimates are not available for 2014-15 for around 49 per cent of tax expenditures — that is, 145 out of 297 expenditures.

Where tax expenditures are not quantifiable, an order of magnitude is provided using the categories set out in Table A2.

Table A2: Orders of magnitude

Order of magnitude range	
Category	Expected tax expenditure (\$m)
0	0 on average over reporting period
1	0 — 10
2	10 — 100
3	100 — 1,000
4	1,000 +
NA	not available

Category classifications are provided as a broad guide only. They are based on assumptions and judgment and should be treated with caution.

The category classification also indicates whether a tax expenditure is positive or negative. For example, '1+' indicates a positive tax expenditure. Where a tax expenditure could be positive or negative, a '+/-' order of magnitude is assigned.

The category assigned to a tax expenditure refers to the year the tax expenditure is considered to be most significant.

OTHER

Consistent with Australian Government budget procedures, tax expenditure estimates are in nominal dollars. For example, 2014-15 estimates are in 2014-15 dollars and 2015-16 estimates are in 2015-16 dollars.

Tax expenditure estimates are prepared on an accruals basis.

A.2 Benchmarks

WHAT IS A TAX EXPENDITURE BENCHMARK?

In order to identify and measure tax expenditures a benchmark must be specified. Tax expenditures are defined and measured as deviations from this benchmark.

The framework for defining the benchmarks used in this statement is based on two principles.

- The benchmark should represent the standard taxation treatment that applies to similar taxpayers or types of activity. Consequently, a benchmark taxation treatment should neither favour nor disadvantage similar taxpayers or activities.
- The benchmark may incorporate certain elements of the tax system which depart from a uniform treatment of taxpayers where these are fundamental structural elements of the tax system. Such elements could include integral design features; for example, the progressive income tax rate scale for individual taxpayers.

Reconciling these two criteria often involves an element of judgment. In particular, there may be different views on which structural elements to include in the benchmark. Consequently, benchmarks vary over time and across countries and can be arbitrary.

The remainder of this appendix provides details of the key elements of the benchmarks. The discussion focuses on the following elements of each benchmark:

- the tax base – the activities or transactions subject to the tax;
- the tax rate – the rate of tax that applies to the base;
- the tax unit – the entity liable to pay the tax; and
- the tax period – the period in which the activities or transactions are undertaken.

A.3 Expenditures related to taxes on income

Australian Government taxes are primarily imposed on income rather than commodities. The following sections outline the general features of the benchmark for income tax (both personal and business), superannuation, fringe benefits and capital gains. These different taxes are discussed separately because they have distinct tax regimes that affect how tax expenditures are measured.

INCOME TAX BENCHMARK

TAX BASE

The tax base for the income tax benchmark is based on the Schanz-Haig-Simons definition of income. An entity's income is defined as the increase in the entity's economic wealth (stock of assets) between two points in time, plus the entity's consumption in that period. Consumption includes all expenditures except those incurred in earning or producing income.

The Schanz-Haig-Simons definition of income conforms to the principal criterion of benchmark design: all income is included in the base regardless of the income earning activity.

Under the income tax benchmark, income includes:

- wages and salaries;
- allowances;
- business receipts;
- realised capital gains;
- interest, royalties and dividends;
- partnership income;
- government cash transfers; and
- distributions from trusts.

Expenses incurred in earning assessable income are deductible. Where an expense is incurred for both income producing and private purposes, deductions are limited to the portion of expenses relating to income production.

A number of tax arrangements depart from the Schanz-Haig-Simons definition of income but are structural features of the tax system and therefore included in the benchmark. Key elements of the benchmark are:

- Assessment applies to nominal rather than real income. Expenses incurred in earning income are deductible at historical cost.
- Some taxpayers (typically individuals) recognise income when it is actually received (cash basis) and other taxpayers (typically businesses) recognise income when there is a right to receive benefits or, in the case of financial arrangements, in the period to which it relates (accrual basis).
- Deductions for expenses related to economic benefits that extend beyond the income year in which the expenditure is incurred are spread over the period of the benefits. This treatment also applies to expenditure in advance (prepayments) for services.
- Imputed rent from owner-occupied housing is not included in income. Expenditure incurred in earning imputed rent is not deductible.
- The mutuality principle excludes income from dealings with oneself or members of mutual associations and societies. For instance, goods produced by taxpayers for their own consumption, or services performed by taxpayers for their own benefit are generally not included in the tax base.
- Certain gains, such as gains received by way of compensation for damage or any wrong or injury suffered by a taxpayer (where compensation is not solely responsible for the loss of income), or gains or winnings from gambling (where taxpayers are not considered to be carrying on a business of gambling), are not included in income.
- Investment income derived from income bonds, funeral policies and scholarship plans of friendly societies that were issued before 1 January 2003 is not included in income.
 - Income relating to policies issued after 1 January 2003 is included in a friendly society's assessable income.
 - To prevent double taxation of income from bonds, funeral policies and scholarship plans, friendly societies can deduct the investment component of the benefits paid out to policyholders (other than the benefits from scholarship plans that are returned to investors rather than paid to the nominated students).

- Losses are deductible against assessable income for a later income year. Losses generally cannot be transferred to other taxpayers, and some losses may only be claimed against certain types of future income.
 - Non-commercial loss rules prevent individuals carrying on unprofitable business activities from claiming deductions for losses arising from such activities against their other income. Losses from non-commercial activities are treated as personal consumption under the benchmark and denial of such losses is therefore part of the benchmark treatment. The Commissioner of Taxation's objective determination of whether a business is commercial in nature, despite making a loss in a given income year, is the basis of the non-commercial losses benchmark.
- Depreciation deductions are made over the effective life of the asset.
- Business capital expenditures not elsewhere recognised within the taxation laws (blackhole expenditures) are deductible over five years.

ARRANGEMENTS TO PREVENT DOUBLE TAXATION

Arrangements to reduce or eliminate double taxation are integral features of the tax system and are included in the benchmark. For example, the imputation system, which eliminates the double taxation of company profits distributed to resident shareholders, is included in the income tax benchmark.

INTERNATIONAL TAX ARRANGEMENTS

Australian residents are taxed on their worldwide income under the income tax benchmark. Consequently, residents are taxed on their Australian source and foreign source income. The various international tax arrangements that ensure foreign source income is subject to the appropriate level of Australian tax are included as structural elements of the income tax benchmark.

Features of the international tax arrangements that are incorporated into the benchmark are:

- Resident taxpayers are allowed to claim foreign income tax offsets up to the amount of Australian tax payable on their foreign income. These arrangements ensure foreign source income is not excessively taxed.
- The controlled foreign company and trust rules ensure Australian residents cannot escape or defer taxation of certain income (often passive in nature) by interposing a foreign resident legal entity.
- Transfer pricing and thin capitalisation rules and interest, dividend and royalty withholding taxes aim to tax appropriately Australian sourced income and are included in the benchmark.

- Foreign residents are taxed on their Australian source income only. As part of this benchmark, where foreign income (or foreign capital gains) earned by an Australian entity is subsequently distributed to a foreign resident, the distribution attracts no Australian tax.
 - Persons in Australia on temporary visas are taxed essentially the same as foreign residents.
- Taxation treaties primarily operate to allocate taxing rights over income between the source country of income and the taxpayer's country of residence. However, some articles (by incorporation into Australia's domestic law) have the effect of imposing taxation or determining source. For distributions of Australian source income to foreign residents, the basic rates of Australian tax (typically imposed as withholding tax) prescribed in these treaties in respect of specified classes of income, such as interest, dividend and royalty income, are included in the benchmark as the applicable tax rates.
 - Under this approach, the benchmark rate of interest, dividend and royalty withholding rates will vary depending on whether the country in question has a tax treaty with Australia.
 - If a tax treaty exists, the benchmark rates of withholding tax for a class of income will be the 'basic rate', where the basic rate is the highest rate specified in the treaty for each withholding tax.
 - Exemptions or reductions relative to the basic rates prescribed in a particular tax treaty will give rise to tax expenditures.
 - If a tax treaty does not apply, any exemptions or reductions from the standard domestic statutory rates will give rise to tax expenditures.

TAX RATES AND INCOME BRACKETS

The tax rate under the income tax benchmark is the legislated tax rate that applies to the relevant entity in each financial year.

The personal income tax system includes the tax-free threshold, the progressive personal income tax rate scale, low-income tax offset, the Medicare levy and, from 2014-15 to 2016-17, the Temporary Budget Repair Levy (TBRL).

The foreign resident income tax scale is also included in the benchmark. Foreign residents are not entitled to a tax-free threshold on Australian sourced income as they typically receive a tax-free threshold in their home jurisdiction. They also are not entitled to the low-income tax offset nor liable for the Medicare levy (although they are liable for the TBRL). This treatment is also included in the benchmark.

TAX UNIT

Individuals and companies are subject to tax. Sole traders, partnerships and trusts are not separate tax units. Income earned by these entities is taxable in the hands of the recipient.

For the personal income tax system in Australia, the benchmark unit is the individual.

For companies, the benchmark tax unit is the company (including the head entity of a consolidated group or a multiple entry consolidated group).

TAXATION PERIOD

The taxation period adopted under the income tax benchmark is the financial year (1 July to 30 June). Consequently, measures that defer taxable income to another financial year, such as income averaging for primary producers (B40) or the Farm Management Deposit Scheme (B39), are reported as tax expenditures. Tax deferral arrangements will generally give rise to tax expenditures in the year income is earned, offset by a negative tax expenditure when the income is taxed.

The benchmark also includes arrangements for entities whose accounting period differs from the standard financial year (for example, companies with a substituted accounting period).

SUPERANNUATION BENCHMARK

Income contributed to superannuation funds (contributions) and earnings of superannuation funds are classified as income of the fund member under the Schanz-Haig-Simons definition. While such income could be considered under the personal income and capital gains tax benchmarks, the unique (and concessional) taxation treatment of superannuation warrants further detail on how the general income tax benchmark is applied to superannuation.

Conceptually, superannuation may be taxed at three stages:

- when contributions are made to a superannuation fund;
- when investments in superannuation funds earn income; and
- when superannuation benefits are paid out.

The income tax benchmark treatment of superannuation is that contributions are taxed like any other income in the hands of the fund member, earnings are taxed like any other investments in the hands of the investor and benefits from superannuation are untaxed. Any costs associated with superannuation investments are deductible under the benchmark.

FRINGE BENEFITS TAX BENCHMARK

Fringe benefits are classified as individual employee income under the Schanz-Haig-Simons definition. The tax base for the fringe benefits tax benchmark is the value of fringe benefits provided to an employee or an associate of an employee in respect of the employment of the employee. Fringe benefits include property rights, privileges or services. Payments of salary or wages, eligible termination payments, contributions to complying superannuation funds and certain benefits arising from employee share schemes are excluded.

The benchmark value of a fringe benefit to an employee is taken to be its market value less any contribution the employee pays from after-tax income. Generally, employers may claim the cost of providing fringe benefits and the amount of fringe benefits tax paid as income tax deductions.

The tax rate that applies under the fringe benefits tax benchmark is the employee's personal marginal income tax rate (consistent with the personal income tax benchmark above). In all cases, fringe benefits tax is calculated on the grossed up taxable value (that is, the pre-tax equivalent value) of the fringe benefit. In some cases, discount valuation methods are available to calculate the taxable value of a fringe benefit. Such methods are reported as tax expenditures.

The employer providing the fringe benefit (rather than the employee receiving the benefit) is the tax unit under the benchmark. This is consistent with the legal incidence of fringe benefits tax, which is payable by employers. The benchmark tax period is the fringe benefits tax year (1 April to 31 March).

CAPITAL GAINS TAX BENCHMARK

Capital gains are classified as income under the Schanz-Haig-Simons definition.

The tax base for the capital gains tax benchmark is realised nominal gains and losses. The benchmark only includes gains or losses arising from the realisation of property where the realisation is not an aspect of the carrying on of a business. This excludes gains or losses that form part of a business's normal trading activities from the capital gains tax benchmark; for instance, gains or losses on trading stock of a business and gains or losses realised in the business of trading particular assets. These gains or losses are dealt with under the general features of the income tax benchmark.

Capital gains are taxable upon realisation. While the taxation of gains on an accrual basis aligns more closely with the broad Schanz-Haig-Simons definition, taxation on a realisation basis is consistent with longstanding practice and recognises the administrative problems associated with an accrual system.

Consistent with the general features of the income tax benchmark, the benchmark for Australian residents is their worldwide capital gains. In the case of foreign residents,

Australia has limited its domestic and treaty capital gains tax rules to the direct or indirect disposal of interests in Australian land (and similar interests such as mining rights) and branch office assets from 12 December 2006. In respect of both the foreign capital gains of residents and the Australian capital gains of foreign residents, the allocation of taxing rights in the domestic laws and tax treaties is part of the benchmark.

The tax rate and tax unit adopted under the capital gains tax benchmark are the same as that which apply under the general benchmark outlined above.

A.4 Indirect taxes

The Australian Government imposes taxes on a range of activities that do not directly relate to income. These 'indirect' taxes include:

- taxes on commodities such as fuel (or energy), tobacco, types of alcoholic beverages and motor vehicles;
- miscellaneous taxes such as agricultural levies and the passenger movement charge;
- crude oil excise and the Petroleum Resource Rent Tax; and
- the goods and services tax.

Commodity taxes may be either ad valorem or volumetric. Ad valorem taxes are charged as a fixed proportion of the value of the commodity sold. Volumetric taxes are charged as a fixed proportion of the quantity of the commodity sold. Consequently, the tax base for these taxes is generally determined either by the value or quantity of the commodity sold.

The Australian Government imposes volumetric taxes on the consumption of tobacco, fuel, beer, spirits and certain imports, and imposes ad valorem taxes on imports and the consumption of wine and luxury cars. These taxes are imposed at either the retail, manufacture or importation stage. In each case, the tax unit is the entity that has the legal obligation to pay the tax.

FUEL (OR ENERGY)

The tax base for the consumption of all fuel (or energy) is split into two activities:

- fuels consumed in an internal combustion engine (that is, primarily for transport use); and
- fuels consumed for a purpose other than in an internal combustion engine (for example, a product that can be used as a fuel in an internal combustion engine but is used in a solvent application or for heating).

The taxation of these activities reflects longstanding and integral features of the tax system whereby excise rates are dependent on whether the fuel is used in an internal combustion engine.

The benchmark excise rates for fuels consumed in an internal combustion engine are the full energy content based rates established using an energy band system and in reference to the rate applying high energy content fuels. The bands used are:

- high energy content fuels, with an energy content of more than 30 megajoules per litre (such as petrol, diesel, biodiesel and aviation fuel);
- medium energy content fuels, with an energy content between 20 and 30 megajoules per litre (such as liquefied petroleum gas (LPG) and fuel ethanol), and an excise rate approximately two-thirds of that applying to high energy content fuels;
- low energy content fuels, with an energy content of less than 20 megajoules per litre (such as methanol), and an excise rate approximately 45 per cent of that applying to high energy content fuels; and
- liquefied natural gas (LNG) and compressed natural gas (CNG) fuels, which are taxed on a mass basis using a conversion rate of approximately 1.37 litres per kilogram.⁴

Fuels consumed other than in an internal combustion engine are exempt from excise under the benchmark.

TOBACCO

The benchmark for the consumption of tobacco and tobacco products is the excise rate that applies to tobacco by weight of tobacco content.

ALCOHOLIC BEVERAGES

The tax base for the consumption of alcoholic beverages is separated into three components based on the types of beverage:

- the consumption of lower alcohol content beverages (beverages not exceeding 10 per cent alcohol content) such as beer and ready to drink beverages;
- the consumption of higher alcohol content beverages (beverages with greater than 10 per cent alcohol content) such as brandy and other spirits; and
- the consumption of wine and alcoholic cider.

⁴ For example, 38.143 cents per litre multiplied by 1.37 litres per kilogram becomes 52.26 cents per kilogram.

Tax Expenditures Statement

The taxation of these activities reflects a longstanding feature of the tax system whereby different tax rates apply to beer, spirits and wine:

- The benchmark excise rate for lower alcohol content beverages (for example, beer) is the volumetric excise rate that applies to full strength packaged beer (including the excise-free threshold of the first 1.15 per cent of alcohol).
- The benchmark excise rate for higher alcohol content beverages (for example, spirits) is the volumetric excise rate on spirits other than brandy.
- The benchmark rate for wine and alcoholic cider is the ad valorem wine equalisation tax rate.

MOTOR VEHICLES

Generally, motor vehicle purchases are not taxed. Consequently, the luxury car tax is a negative tax expenditure.

CUSTOMS DUTIES

Like goods should be subject to like rates of tax, regardless of their source. Consequently, the customs duty benchmark treats goods imported into Australia as being subject to the same taxes on consumption as domestically produced goods.

Under the customs duty benchmark, goods imported into Australia are free from customs duty, except to the extent that the customs duty imposed is equivalent to taxes imposed on domestically produced goods, such as excise-equivalent customs duties or goods and services tax (GST).

Customs duty, other than excise-equivalent duty and GST collected as a customs duty, collected on certain goods imported into Australia is reported as a negative tax expenditure in this statement.

PASSENGER MOVEMENT CHARGE

The Passenger Movement Charge is a charge imposed in respect of the departure of a person from Australia.

The tax base for the Passenger Movement Charge benchmark is the departure of all persons from Australia for any other country, whether or not the person intends to return to Australia, excluding on-duty crew members. The tax unit is the relevant carrier.

PRIMARY INDUSTRY LEVIES

Primary industry levies provide collective industry funding for activities such as research and development, promotion and marketing, residue testing and plant and animal health programs.

The tax base for primary industry levies depends on the particular levy. The tax base will generally be related to the inputs, outputs or units of value of production of the industry.

Under the benchmark, levies are only applicable to the specific products that will benefit from the activities to be funded by the levies. In addition, levies are only payable in respect of products which are used for income producing purposes by the levy payer; that is, exemptions for products which are unfit for human consumption or exemptions for products used by the producer for domestic purposes form part of the benchmark.

The tax rate is the rate specified in the relevant legislation for each levy. The tax unit is the levy payer.

NATURAL RESOURCES

The natural resources benchmark only applies to the extraction of petroleum products (crude oil, natural gas, LPG, condensate and coal seam gas) with some variation in treatment before and after the expansion of the PRRT on 1 July 2012. The benchmark does not apply to the extraction of other natural resources.

From 1 July 2012

From 1 July 2012, the PRRT applies to all petroleum production offshore and onshore (including coal seam gas). Consequently, the natural resources benchmark applying from 1 July 2012 is based on the new taxation arrangements and applies to all petroleum and coal seam gas.

The benchmark is a 40 per cent tax rate on the economic rents earned on the extraction of these resources. There is a full tax-loss offset which can be utilised by transferring tax losses among commonly owned projects that are subject to the same tax rate. The tax unit is the project interest.

The benchmark also includes immediate expensing of project expenditures. To the extent that losses are carried forward because they cannot be utilised immediately, they are uplifted at the long-term government bond rate (a proxy for the risk-free rate). The uplift rate compensates investors for the delay in the recognition of the tax credit and preserves the value of the tax credit over time. A refund of unutilised tax credits is available when the project closes down.

Under the arrangements applying from 1 July 2012, crude oil excise is still payable in respect of certain petroleum production, and is creditable against the project's PRRT liabilities. Where this occurs, the crude oil excise paid in a period is treated as a prepayment of the PRRT liability for that period. To the extent that the tax prepayment exceeds the PRRT liability in a year, a negative tax expenditure arises for the year, while credits for overpayments recouped in subsequent years would count as positive tax expenditures in those years.

Before 1 July 2012

The benchmark for the period up to 30 June 2012 reflects the PRRT arrangements prior to the 2012 amendments. It is the same as the benchmark applying from 1 July 2012, except:

- it does not apply to onshore projects (including coal seam gas) or projects located in the North West Shelf;
- the tax unit is the petroleum project;
- the non-refund of tax credits at project end are part of the benchmark treatment;
- the uplift rates for carried forward losses are also part of the benchmark (the long term bond rate plus 15 percentage points for exploration expenditure and the long term bond rate plus 5 percentage points for general project expenditure); and
- crude oil excise is a separate benchmark with the following features:
 - the barrel equivalent production of crude oil from fields of greater than 30 million barrels as the tax base;
 - the rate of tax that applies to crude oil as the tax rate, with applicable rates determined by the date that the field was discovered (that is, new, intermediate or other); and
 - the entity that has the legal obligation to pay the tax as the tax unit.

GOODS AND SERVICES TAX

The goods and services tax (GST) is an indirect, broad based consumption tax charged at the rate of 10 per cent. While the economic incidence of the GST is primarily on the final supply provided to a private consumer, the legal incidence is at each step in the supply chain, with registered entities (that is, entities carrying on an enterprise) including GST in the price of goods and services they sell. If the recipient of the supply is a registered entity, it will normally be able to claim a credit for the amount of GST in the price.

The tax expenditures relating to GST are generally connected to supplies which are GST-free or input taxed (the latter case includes the expenditure associated with allowing reduced credit acquisitions). If a supply is GST-free, there is no GST payable on the supply and the supplier is entitled to claim credits for the GST payable on its related business inputs. If a supply is input taxed, no GST is payable on the supply, but the supplier generally cannot claim input tax credits (ITCs) on its related business inputs. In the case of reduced credit acquisitions, however, the supplier may be entitled to claim reduced input tax credits on its related business inputs.

Tax base

Under the GST benchmark, the tax base for the GST is the value of household final consumption expenditure plus the value of private dwelling investment where these are supplied in the course of an enterprise.

There are structural elements of the GST system that are included in the benchmark. These elements are:

- Non-commercial activities of governments are exempt from GST under the benchmark.
- Exports and other supplies for consumption outside Australia are not subject to GST. This is a fundamental element of the benchmark and is not treated as a tax expenditure.
- Goods and services supplied to oneself are not subject to GST. This treatment is included in the benchmark and is not treated as a tax expenditure.
- ITCs are provided to registered entities in respect of the GST they pay on business inputs. The provision of ITCs to businesses is a fundamental design feature of the GST and is not treated as a tax expenditure.
- Imputed rent from owner-occupied housing is not subject to GST. Owner-occupied housing is effectively treated as input taxed. To ensure neutrality between owner-occupiers and investors, supplies of residential accommodation and long-term commercial residential accommodation by landlords are also generally treated as input taxed supplies, meaning landlords are not entitled to claim ITCs and do not charge GST on the rent paid by tenants. The input taxation of supplies of residential accommodation is included as a structural element of the benchmark.
 - The sale of new residential premises and the value of alterations, additions and improvements to residential premises are subject to GST. The subsequent resale of residential premises is an input taxed supply. These features of the GST system are included as structural elements of the benchmark.

Tax unit

While the economic incidence of the GST is primarily on the final recipient of a supply (generally the final private consumer or an input taxed business), the tax unit responsible for remitting GST is the supplier of the goods or services concerned. The principal exception to this is in the case of 'reverse charging', where the recipient is liable to pay GST.

- Reverse charging occurs in certain situations where the importation of a supply from overseas can be taxable. This may apply, for example, where an overseas registered supplier itself imports goods into Australia and installs them in Australia. The overseas supplier and an Australian recipient may agree that the GST should be paid by the recipient, not the supplier.

Taxation period

The taxation period adopted under the goods and services tax benchmark is the financial year (1 July to 30 June).

A.5 Modelling tax expenditures

This section provides an overview of the various modelling techniques used in the TES to estimate the value of tax expenditures.

The methods used to calculate the estimates of individual tax expenditures in this statement vary. The appropriate approach is determined by the nature of the tax benchmark, the particular tax concession examined and the availability of data. Data availability is a major factor influencing the reliability of the estimates, and in many cases estimates are not provided owing to data limitations.

The approaches used to estimate tax expenditures include aggregate modelling, distributional modelling and microsimulation. The approach most commonly used is distributional modelling.

AGGREGATE MODELLING

This approach involves using information on the aggregate volume of transactions to calculate the value of a particular tax concession. Aggregate modelling is an appropriate approach for measuring tax exemptions or concessions where the impact can be represented as a simple proportion of the total transactions concerned. Data sources suitable for aggregate modelling include national accounts data, trade and production statistics, and aggregates derived from administrative databases (such as taxation records).

Aggregate modelling is used to estimate tax expenditures for fuel excise. Tax expenditures for exemptions or reduced excise rates can be estimated from statistics on the aggregate volume of fuels produced.

DISTRIBUTIONAL MODELLING

This approach involves using discrete aggregate data to calculate the impact of tax concessions on particular segments of the economy. Distributional modelling is an appropriate approach for measuring concessions that vary according to the characteristics of the taxpayer. Data sources suitable for distributional modelling include survey data and data derived from administrative databases.

Distributional modelling is used to estimate tax expenditures for personal income tax concessions when the cost is related to a taxpayer's taxable income. For these concessions, data on income distribution and tax concessions by grade of taxable income can be used to estimate the cost of tax expenditures for those concessions.

MICROSIMULATION

This approach involves examining detailed datasets, such as taxpayer records, to determine the value of taxable transactions for each taxpayer. The value of the tax expenditure is the difference between the tax paid on those transactions under the concession and the tax that would have been collected under the benchmark. Microsimulation modelling requires either a comprehensive database of all taxpayers or a detailed sample that is representative of the population. The data must provide sufficient detail on the value of transactions affecting the calculation of tax liabilities to allow the required calculations.

Microsimulation modelling is used to estimate tax expenditures that closely target particular taxpayer groups (for instance, benefits subject to detailed eligibility tests) and concessions where the payment rate varies considerably according to taxpayer behaviour or circumstance.

Microsimulation modelling can also be used to derive key information, such as average effective tax rates, which can be used in other models that employ aggregate or distributional modelling. This is appropriate for situations where detailed datasets are not available for all items.

A.6 Notes on the methodology used to estimate certain tax expenditures

TREATMENT OF IMPUTATION

The value of some concessions reported in this statement is partially offset as a result of the imputation system. For example, concessions that reduce company tax may be clawed back through the subsequent taxation of dividends in the hands of shareholders. The estimates in this statement generally make no allowance for this clawback owing to the practical difficulties of doing so.

INCOME TAX CLAWBACK

In addition, the value of some tax expenditures can include an income tax clawback. An income tax clawback will occur when a taxpayer's taxable income is affected by the operation of a particular tax expenditure.

For example, an income tax clawback can occur in respect of taxes that are deductible for income tax purposes and that are not passed on to final consumers through higher prices. That is, while a tax expenditure may offer a concession to a group of taxpayers or type of activity, if that concession were removed, there would be a resulting increase in deductible expenses and decrease in income tax paid that would partially offset the additional tax liability.

Tax expenditure estimates for consumption taxes generally do not include an income tax clawback as consumption taxes are usually assumed to be passed onto final consumers, resulting in no change to the taxable income of the taxpayer. Tax expenditure estimates for other taxes can include an income tax clawback where the tax is assumed to be borne by the taxpayer.

CAPITAL GAINS TAX ESTIMATES

Under the CGT benchmark, nominal capital gains are fully taxable upon realisation. The most significant tax expenditure against this benchmark is the 50 per cent discount for capital gains realised by resident individuals and trusts, which affects most capital gains realised by these entities.

Individuals and trusts may also be eligible for other CGT concessions. The revenue forgone methodology that is generally used in this statement implies that estimates for these other CGT concessions should be calculated against the benchmark of full taxation of nominal capital gains.

To avoid double counting, the values of tax expenditures for other CGT concessions are reduced by the CGT discount component and the discount component of these other concessions is included in the tax expenditure for the CGT discount (E11). This modification to the tax expenditure methodology provides more realistic estimates of the value of the benefits taxpayers receive from capital gains concessions in aggregate, though it has the effect of understating the value of individual CGT tax expenditures other than the discount.

A.7 Accrual estimates

Accrual accounting was introduced by the Australian Government in the 1999-2000 Budget. The Australian Accounting Standards and Government Finance Statistics standards for accrual accounting require that taxation revenue be recognised in the reporting period in which the taxpayer earns the income that is subsequently

subject to taxation – this is known as the Economic Transactions Method (ETM). But the standards also permit government reporting using an alternative approach when the ETM approach would generate unreliable measures of taxation revenues.

Because ETM is an unreliable measure for several significant revenue heads – and these account for the majority of total revenue – all taxation revenue was recognised using the Tax Liability Method (TLM) in all accrual budget related documentation from the 1999-2000 Budget to the 2005-06 MYEFO. Under TLM, taxation revenue is accounted for at the time a taxpayer makes a self assessment or when an assessment of a taxation liability is raised by the relevant authority.

Commencing with the 2006-07 Budget, the Australian Government adopted ETM revenue recognition for all revenue heads where the measurement issues are not material, but retained TLM revenue recognition where ETM measurement issues may be material. The taxation revenues that continue to be recognised on a TLM basis are:

- individuals and other withholding taxation;
- company income taxation; and
- superannuation taxation.

Tax expenditure estimates have been prepared on the same revenue recognition basis as the budget estimates.

APPENDIX B: CHANGES TO TAX EXPENDITURES IN 2014

This Appendix provides an outline of the changes to the list of tax expenditures since the 2013 Tax Expenditures Statement. Since the 2013 TES, 17 tax expenditures have been modified and 58 tax expenditures have been deleted.

B.1 Modified tax expenditures

Table B.1 reports tax expenditures that have been modified since they were last reported in the 2013 TES.

Modified tax expenditures refer to tax expenditures that have changed materially, for example because of a change to the benchmark, a measure that has been announced since the 2013 TES, a decision to remove a tax expenditure in a certain year, an amalgamation or split of tax expenditures, or the inclusion of a new element to an existing tax expenditure.

Table B.1: Modified tax expenditures

TES code	Tax expenditure title	Modification to the tax expenditure
A19	Medicare levy exemption for residents with taxable income below the low-income thresholds	The Medicare levy low-income threshold for families has been increased from the 2013-14 income year.
A29	Dependency tax offsets	The Dependent Spouse Tax offset (DSTO) and the invalid relative, parent, parent-in-law, housekeeper, housekeeper (with child), child-housekeeper and child-housekeeper (with child) tax offsets are being abolished for all taxpayers from 1 July 2014, subject to passage of legislation.
A32	Mature Age Worker Tax Offset	The Mature Age Worker Tax Offset is being abolished from 1 July 2014, subject to passage of legislation.
A40	Exemption of Government contributions to First Home Saver Accounts	First Home Saver Accounts will be abolished from 1 July 2015 and eligibility for Government contributions will cease from 1 July 2014, subject to passage of legislation.
A42	Tax treatment of First Home Saver Accounts earnings	First Home Saver Accounts will be abolished from 1 July 2015, subject to passage of legislation.
B10	Concessional tax treatment of offshore banking units	Deferral of the start date of reforms to the offshore banking unit regime to income years commencing on or after 1 July 2015.
B39	Farm Management Deposit scheme	Non-primary production income limit increased from \$65,000 to \$100,000.
B45	Shipping — refundable tax offset for employers of qualifying Australian seafarers	The seafarer tax offset will be repealed from 1 July 2015.

Table B.1: Modified tax expenditures (continued)

TES code	Tax expenditure title	Modification to the tax expenditure
B74	Accelerated depreciation for software	The period over which capital expenditure on in house computer software is depreciated is to be increased from four years to five years.
B79	Research and development — exemption of refundable tax offset (current scheme)	The rate of the research and development refundable tax offset will decrease from 45 per cent to 43.5 per cent of expenditure from 1 July 2014, subject to passage of legislation.
B80	Research and development — non-refundable tax offset	The rate of the research and development non-refundable tax offset will decrease from 40 per cent to 38.5 per cent from 1 July 2014, subject to passage of legislation.
C11	Tax on excess non-concessional superannuation contributions	Individuals will have the option to withdraw superannuation contributions in excess of the non-concessional contributions cap made from 1 July 2013 and any associated earnings, with the earnings to be taxed at the individual's marginal tax rate.
D23	Certain relocation and recruitment expenses - exemption and reduction in taxable value	<i>Exemption for engagement of a relocation consultant</i> (D36 in the 2013 TES) and <i>Reduction in taxable value of certain relocation and recruitment expenses</i> (D49 in the 2013 TES) have been merged with <i>Exemption for certain relocation and recruitment expenses</i> (D31 in the 2013 TES).
F8	Concessional rate of excise levied on aviation gasoline and aviation turbine fuel	From 1 February 2015, the re-introduction of biannual indexation by the consumer price index of excise for all fuels except aviation fuels.
F9	Excise concessions for 'alternative fuels'	From 1 July 2015, ethanol and biodiesel excise rates will fall to zero. Over five years, rates will increase (in addition to indexation) until they reach energy content equivalency, discounted by 50 per cent.
F10	Excise levied on fuel oil, heating oil and kerosene	From 1 February 2015, the re-introduction of biannual indexation by the consumer price index of excise for all fuels except aviation fuels.
F11	Excise levied on fuel products used for purposes other than as fuel	From 1 February 2015, the re-introduction of biannual indexation by the consumer price index of excise for all fuels except aviation fuels.

B.2 Deleted tax expenditures

Table B.2 reports tax expenditures that have been deleted since the 2013 TES. Deleted tax expenditures generally arise because the relevant tax provisions have been abolished or cease to have effect within the reported time horizon of a particular TES.

In the 2014 TES, deleted tax expenditures include tax expenditures that have been abolished and do not have an impact over the forward estimates.

Table B.2: Deleted tax expenditures

2013 TES code	Tax expenditure title	Reason for deletion
A2	Exemption of official salaries and certain other income of the Governor-General and Governor of any State	This exemption no longer exists as the current Governor-General and State Governors have all been appointed after 28 June 2001 and do not qualify for the tax exemption.
A16	Education Tax Refund	The Education Tax Refund was abolished on 26 May 2012 when it was replaced by the Schoolkids Bonus.
A28	Exemption of the Baby Bonus	The Baby Bonus was discontinued from 1 March 2014 and the Maternity Immunisation Allowance was discontinued from 1 July 2012.
A31	Flood and cyclone reconstruction levy	The temporary flood and cyclone reconstruction levy expired on 30 June 2012.
A43	Exemption of the first child tax offset (Baby Bonus)	The first child tax offset expired on 30 June 2009.
A44	Exemption of Utilities Allowance and Seniors Concession Allowance	The Utilities Allowance and Seniors Concession Allowance expired on 20 September 2009.
A52	Income tax exemption for LPG conversion grants	The LPG vehicle scheme expired on 30 June 2014.
A59	Exemption of Tax Bonus for Working Australians	The <i>Tax Bonus for Working Australians Repeal Act 2013</i> received royal assent on 27 May 2014 and has a date of effect from 28 May 2014.
A64	A reasonable overtime meal allowance	Reporting modification - no tax expenditure exists.
A66	Certain travel expenses in and outside Australia	Reporting modification - no tax expenditure exists.
B12	Deemed tax credits under tax sparing provisions in Australia's tax treaties	Most of the tax sparing articles have expired or never entered into force. This no longer has an impact over the reported time horizon.
B31	Exemption of Tobacco Growers Adjustment Assistance grants	This no longer has an impact over the reported time horizon.
B39	Conservation tillage refundable tax offset	The conservation tillage refundable tax offset was repealed as part of the repeal of the carbon pricing mechanism on 17 July 2014.
B45	Tax exemption for farm help re-establishment grants	The Farm Help Re-establishment Grant Scheme was repealed with effect from 1 July 2014.

Table B.2: Deleted tax expenditures (continued)

2013 TES code	Tax expenditure title	Reason for deletion
B47	Infrastructure Bonds Scheme	The issue of certificates that give rise to the tax concessions has been terminated for new cases by the <i>Taxation Laws Amendment (Infrastructure Borrowings) Act 1997</i> .
B53	25 per cent entrepreneurs' tax offset	The entrepreneurs' tax offset was repealed with effect from the 2012-13 income year.
B55	Capital protected borrowings	The concession expired on 30 June 2013.
B64	New tax system for managed investment trusts	This no longer has an impact over the reported time horizon.
B65	Philanthropy — Income tax exemption for certain non-charitable funds	Section 50-20 of the <i>Income Tax Assessment Act 1997</i> was repealed by the <i>Charities (Consequential Amendments and Transitional Provisions) Act 2013</i> , which received Royal Assent on 28 June 2013, with a date of effect of 1 January 2014.
B70	Pooled Development Funds	The Pooled Development Funds program was closed to applications for registration on 21 June 2007.
B74	Tax incentives for film investment	The incentive expired on 1 July 2010.
B75	Accelerated depreciation for grapevine plantings	This concession is not available for grapevines planted after 1 October 2004.
B78	Landcare and water facility offset	This concession expired on 30 June 2001.
B85	Capital expenditure deduction for mining, quarrying and petroleum operations	This concession expired on 30 June 2001.
B86	Deduction for environmental protection activities and environmental impact studies	This concession expired on 30 June 2001.
B94	Establishment costs for carbon sink forests	This concession expired on 30 June 2012.
B95	Research and development — exemption of refundable research and development tax offset payments (former scheme)	The Research and Development tax offset expired on 30 June 2011.
B97	Research and development — immediate deduction for expenditure on core technology	This deduction expired on 30 June 2011.
B99	Research and development — premium tax concession for additional expenditure	This concession expired on 30 June 2011.
B100	Research and development — Research and Development Tax Concession	This concession was abolished on 30 June 2011.
B103	Small business and general business tax break	This concession expired on 31 December 2010.
B104	Exemption of tax offsets paid under the National Urban Water and Desalination Plan	The tax offset expired on 30 June 2014.
B106	Company loss carry-back	The loss carry back provisions ceased to apply commencing from the 2013-14 income year.
C10	Superannuation — tax on excess concessional contributions	Reporting modification - this tax expenditure exists in C5 <i>Concessional taxation of employer superannuation contributions</i> and C8 <i>Concessional taxation and exemption of certain personal superannuation contributions</i> from the 2013 TES.
D25	Discounted valuation of travel for airline employees and travel agents	Legislation was repealed in 2013.
