

NDIR Submission from Barry Jaques

Dear Sirs,

I totally oppose the idea of supporting irresponsible people, who build on river plains or valleys and expect to be compensated, in case of a flood.

I believe that in most areas in Queensland, information for flood risk has been available for many years. If people choose to build in a high risk area then their insurance is their problem, not mine.

I do not want to pay higher premiums to subsidise people choosing to build in high risk areas.

Barry Jaques
