

## SUBMISSION FOR FSI

We request that your decisions help Australia to return to the proud productive country it used to be.

Do not bring in BAIL IN and respect the Australian individuals. We need a return to manufacturing, farming and infrastructure as there used to be, making employment for many people, which used to be productive employment, not just jobs with no benefit to the country. Pass Glass-Steagle banking system.

We need honesty within Govt which we no longer seem to see. We request a banking system which Australia controls not some global banking system that Australia has to conform to. We need to return to Australian owned and run Companies, not multinationals. We need to be able to buy Australian made goods and food. We need to acknowledge Food Security. Please put Australia first before it is too late.

Dorothy Laverty , Taylors Arm NSW
