Notes:

- The cumulative number of entities with a processed claim is based on the number of entities (unique ABNs) with a processed claim in at least one period across the first, second and third hiring periods.
- In the table, the number of entities with a processed claim is the number of entities (unique ABNs) with a processed claim form in each specific period. These figures cannot be added together as this would double count entities with a processed claim form in multiple periods.
- The number of entities with a processed claim form includes forms that may be subject to a payment suppression including for eligibility checks or compliance action, or have resulted in a nil claim.
- Unique eligible employees nominated for a claim is where an employee has been nominated in at least one period with the employer having a net payment in the same period. The count of individuals may include an employee more than once where they change the employer who is claiming for them.
 - The number nominated relates to employees nominated for the JobMaker Hiring Credit scheme through Single Touch Payroll.
