

# Mental Health of Australian Defence Force Veterans

Evaluating the Swiss 8 app for  
Australian Defence Force Veterans

**Jake Gary Jubelin**

PhD Student  
School of Medicine and Public Health

# Overview

1. Background to the ADF
2. Mental Health in the ADF
3. The Swiss 8 App
4. The Swiss 8 Research Project
5. Preliminary Findings
6. Questions

# **The Australian Defence Force (ADF)**

- **Army, Navy and Air Force**
- **80% male; Largest age group 20-29 years**
- **One of Australia's major employers**
  - ~ 80,000 personnel across full and part-time
  - ~ 6,000 personnel separate each year
- **Various service types - Full-time, Part-time, CFTS**

# What is a veteran?

“

A person who is serving  
or has served in the ADF

”

# Mental Health in the ADF

## Current Serving

Similar rates of Mental Health disorders compared to the Australian Population

Different prevalence across Rank, Branch of Service and Age

Suicide rate  
48-51% LOWER than Australian Population

## Ex-Serving

Significantly higher levels of Psychological Distress

Different prevalence across transition status, time since and reason for discharge

Suicide rate  
24% HIGHER (males)  
102% HIGHER (females)  
than Australian Population

# The Swiss 8 App

- Designed by veterans for veterans
- Mobile, accessible, holistic
- Proactive approach
- Daily routine
- **Fitness, Nutrition, Mindfulness, Sleep**
- Library of content
- Connection to community

## Recruitment

- Recruited via Swiss 8 Social media pages
- Organic sharing of advertisements

## Participation

- 156 Completed Pre-Survey
- Download and use the app as much as they like
- Contact group received fortnightly contact
- After 3 months invited to take part in Post-Survey

## Enrolment

- 375 completed the eligibility questionnaire
- 156 were eligible and provided consent
- Randomised to one of two groups

## Completion

- Currently 51 people have completed the Post Questionnaire
- 13 consented to take part in a Post Swiss 8 Interview

# Outcomes

## 1. Psychological Distress

- Changes in Pre and Post K10 score

## 2. Quality of Life

- Changes in Pre and Post QoL-8

## 3. Fortnightly contact

- Influence on app usage and K10/QoL scores

## 4. App Usage

- Duration and frequency of App usage

## 5. Perceptions and attitudes

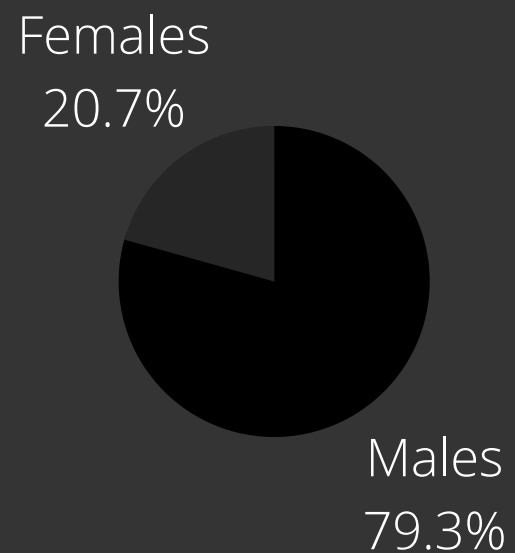

- Experience with Swiss 8 and their transition from ADF

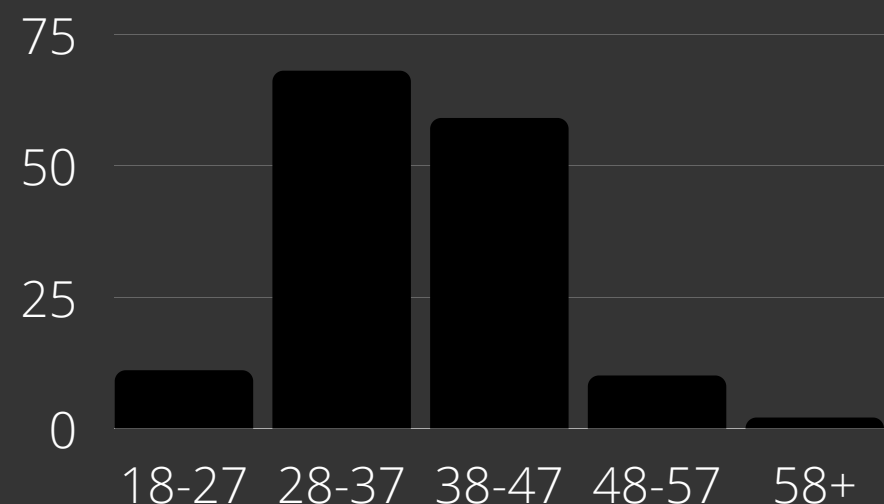

# Descriptive Data

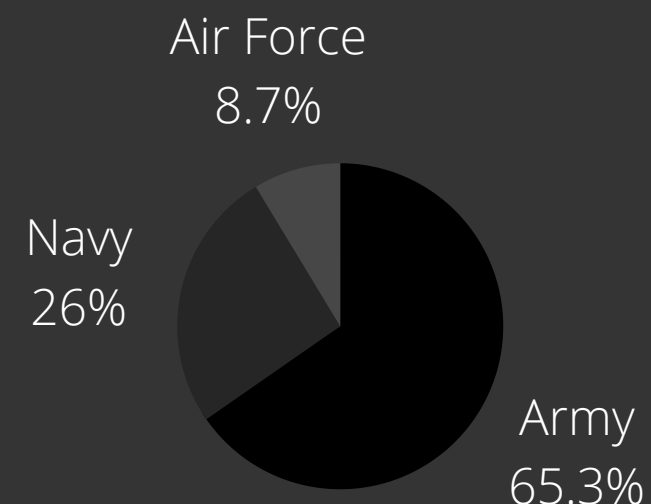

## Gender

## Age

## Service

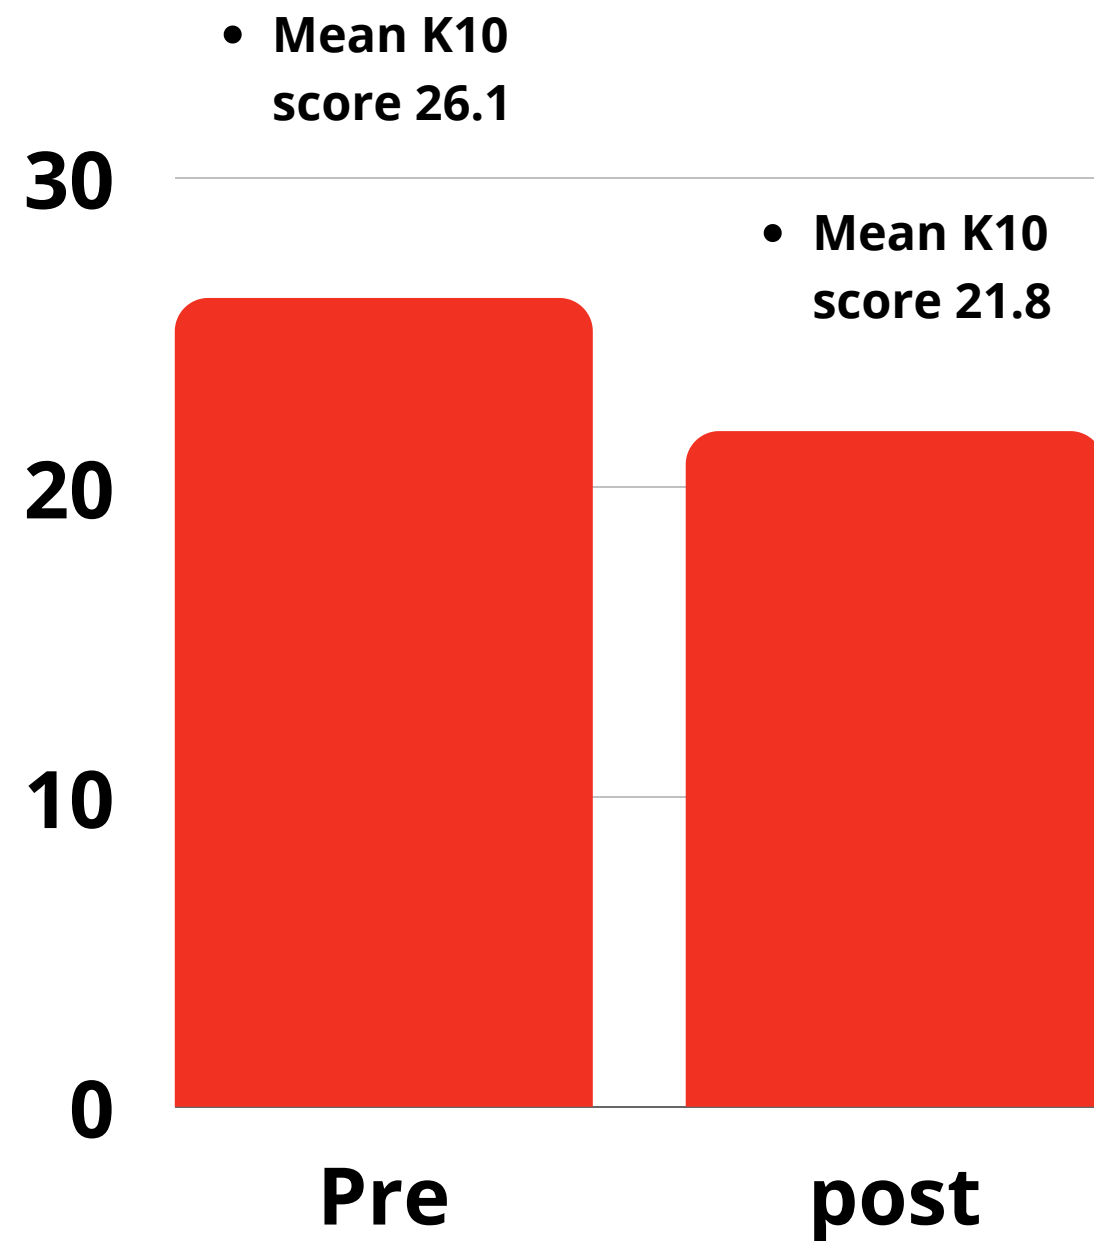

## How difficult was your transition?

64% found their transition difficult or very difficult

# Preliminary findings

Word cloud containing terms: accountability, connection, routine, experience, shared, community, others, models, brotherhood, interaction, daily, belong, connecting, human, calendar, shared.

• Final data capture and analysis due for completion in April 2022

# Questions
