

Regional banking

I am demanding as a regional Australian that the Government must rebuild National banking on a regional basis, here in the regions we have to travel many miles to do banking, and if I wish to invest any money at banks I would much prefer it to be in a national bank, the big four banks would not be using my funds to invest in Australia but would instead be using it to invest in international stocks and bonds, this does not help this country at all, a national bank, on the other hand, could be used exclusively for Australian investment.
