

Australia post bank

To whom it may concern,

As someone who has been watching the banking system slowly disintegrate into an entity which harms the community and Australians in general, I call for an Australia post bank to be implemented Across this country to bring service back to the community. Also I wish a Royal commission be implemented to find the driving forces behind the sale of the commonwealth bank a bank of the people to entities which do not serve Australians. We need to detach ourselves from the global banking system which has become too large and too powerful and takes money from Australians and transfers our wealth overseas. Thankyou for you time in reading this email.

Regards

Leon Hanford
