

Post office bank

Hello...

I would like to make it know that I support the formation of a "POSTAL BANK" here in Australia.

Too long have the Commercial banks been given controll to oversee themselves and have been found to be only looking after their own profits and not taking on their responsibilities toward every say Australians, ESPECIALLY the poor and elderly as they are the ones who are most affected by alm of the service cuts and very high fees that all the Commercial banks charge.

We NEED an alternative to the Commercial banks to provide the services that should be available to All Australians, especially those in regional areas and Special consideration should be given for the needs of the elderly in regard to accessibility to "real" banking, not the online version that only suits the the Commercial banks.

Please do the Right thing by the Australian people by starting a Postal banking service that is Fair & accessible to all Australian.

This is the duty of elected officials...

To stand up for those who have No voice and protect the people of this Nation from the greed and overreach of the Commercial Banks.

Thank you

Regards

Gerard Saber
