

## **Australia Post Bank Submission**

To the Regional Banking Taskforce, as a person living in regional South Australia I implore you to think of all the Big Four Banking Customers that depend on the banks to have a local branch office. There is no real competition within the Banking Industry in regional areas and the first one to close their people operated branch office will signal to the rest that it's ok to force regional customers to use online banking and ATM's... leaving especially older people in the community without personal banking services. One way to ensure this doesn't happen is to have an AUSTRALIA POST BANK so regional people can have faith in there being banking services that are more than just Private Central Banks ripping people off and closing down their branches just to increase their own profit margins! Please give us an AUSTRALIA POST BANK.

Thank you,  
Kevin Sonnack.
