Dear Director,

Thank you for the opportunity to submit a response to the consultation on the proposed legislation

RE: Franked Distributions and Capital Raising.

I object to the proposed legislation changes.

I believe the draft legislation is inequitable to Australian companies and shareholders and it could inadvertently impact situations of legitimate company operations.

The draft legislation fails to recognise the fundamental principle underlying the franking regime and the reason for its creation, the avoidance of double taxation on company earnings.

The Franked Distribution and Capital Raising draft legislation, if widely applied, will lead to the demise of the franking system. It will stop Australian companies who issue new shares under a Dividend Reinvestment Plan (DRP) from paying franked dividends and significantly increase the cost of capital for all franked dividend paying Australian companies. It will also risk the stability and integrity of the Australian banking system by inhibiting effective capital raising during challenging economic periods such as the start of the coronavirus pandemic.

I am a semi-retiree with a dependent wife. Almost my entire living income depends on franked dividends. I have already paid my personal taxes for over 40 years to raise the capital I need to generate my income at great market risk. So to add a third level of tax before I can buy groceries and stay off government welfare is too much.

Yours sincerely,

Domenic Antonucci
