

Dear Sir/Madam,

My wife and I rely on franking credits for our annual holiday to Lakes Entrance and Merimbula.

My wife is currently 72 and suffers from schizophrenia. She is unable to cook of a night and the franking credits allow us to purchase our evening meals from Choice Meals for 3 days a week. We would not be able to afford these meals without franking credits. The dividends and franking credits that we receive enable us to get by with limited government support. I urge you not to make any changes to the existing legislation.

Yours Faithfully
Ken Cridland
