Dear Director,

Thank you for the opportunity to submit a response to the consultation on the proposed legislation relating **to Franked Distributions and Capital Raising.**

I object to the proposed legislation changes.

I believe the draft legislation is inequitable to Australian companies and shareholders and it could inadvertently impact situations of legitimate company operations.

The draft legislation fails to recognise the fundamental principle underlying the franking regime and the reason for its creation, the avoidance of double taxation on company earnings.

The Franked Distribution and Capital Raising draft legislation, if widely applied, will lead to the demise of the franking system. It will stop Australian companies who issue new shares under a Dividend Reinvestment Plan (DRP) from paying franked dividends and significantly increase the cost of capital for all franked dividend paying Australian companies. It will also risk the stability and integrity of the Australian banking system by inhibiting effective capital raising during challenging economic periods such as the start of the coronavirus pandemic.

If passed, its application would also unfairly burden Australian investors with retrospective tax debts, to be paid at a time of economic uncertainty.

**I voted for Liberal in the 2019 election because of the threat of the Labor party abolishing franking credits. I then voted for you, the Labor party in the 2022 election because there was no mention of this franking credit debacle. The Labor party so far is doing a fantastic job in government, PLEASE don't ruin your chances over this pathetic draft legislation and make me vote against the Labor party.**

Yours sincerely

Roberto Facchin
