

I completely object to the Proposed “ Retiree’s Tax “ !

The Federal Labor government went into the last election with next to no Labor Policies and now once elected, have shown there real hand in bring in policies that the Australian People didn’t vote for !

This is a “ Tax on Retiree’s “ and in particularly those on Old Age Pensions some small Share Holdings and those who have worked extremely hard to build up an investment portfolio so they can fund there own Retirement and not to rely on the Australian People to fund.

Of those, the Self Funded Retirees that fall just outside the Old Age Pension or moderately so, will be the biggest losers which might just put them over the limit and then become a burden to the Australian People.

I completely reject the introduction of this policy until All Australian’s have an opportunity to vote for or against it ?

Regards,
Ian Maddison
