**Subject:** Changes to legislation regarding franked dividends

To whom it may concern

I am totally in disagreement with this proposed legislation as it will disadvantage many people especially older people like myself.

My husband passed away recently and I am a widow so this income is important for me and all older people, my husband and I worked hard all our life in our own business and have never received any government help . I hope that this situation will continue as I do not want any help.

Please carefully consider this system which has been in place very successfully for many years and has put our country in a better financial position than many other countries so that no change is needed.

Yours faithfully

Joan Cusack
