

Dear Minister Jones

I welcome this consultation process and thank you for opening this discussion. I will be one of the advisers with 22 years continuous record, no disciplinary action, full CPD compliance and passed the FASEA exam at first go . I am currently about to sit the Professional and Ethics bridging course exam.

Education doesn't guarantee a compliant and ethical approach , but there are many more factors which only experience can provide

This change if implemented will allow me to continue in my "profession" beyond my original plan

Regarding self-assessment, I for one would be happy to sign a "stat dec" if this provides this more rigour

Thank you
